Sustainability

360
ONE

Our name reflects our philosophy of service. It embodies the holistic perspective we bring to performance, progress and possibilities.

In a world where climate change is increasingly evident, we, as one of India's leading wealth and asset management firms, remain conscious of our actions and are resolute in reducing our ecological footprint. We recognise that prosperity is meaningful only when it ensures sustainability. We choose to achieve it via environmental stewardship, social responsibility and ethical governance.

Our strength comes from being agile and forward-thinking. It is reflected in the programmes we build to empower talent, bridge skill gaps and create meaningful opportunities. Integrity, compassion and commitment to sustainability constitute the bedrock of our stability. Collectively, these tenets enable us to navigate change with confidence and purpose.

The past year, marked by market highs and sharp corrections against a backdrop of geopolitical uncertainty, tested the resilience of businesses across the globe. This environment demanded trust and transparency, and we take pride in upholding these values through a robust governance framework that guides us to act responsibly and remain accountable for every decision. We strive to build an organisation whose reputation endures and whose commitment to sustainability remains steadfast.

The responsibility of shaping a sustainable tomorrow, rests on the choices we make today. A culture of innovation and high performance enables us to make timely decisions about developing talent, allocating capital, and investing in future-ready initiatives. With this foundation, we are well-positioned to sustain growth, serve diverse client needs, and capture new opportunities.

Since FY 2021-22, the Organisation has integrated ESG related disclosures into its Annual Report as part of the Business Responsibility and Sustainability Report ("BRSR") and it published its 4th BRSR as part of the Annual Report for FY 2024-25. Further, the Company published its maiden Sustainability Report for FY 2022-23, which aimed at communicating its sustainability efforts and to demonstrate its commitment to responsible business practices.

With this 3rd sustainability report, the Company aims to share its continued efforts and initiatives taken to further integrate ESG into its business operations and sustained value creation for its stakeholders and society.

About the Report

Report scope and boundaries

This report presents the sustainability performance of 360 ONE WAM Limited for the FY 2024-25 and covers the Company's domestic operations. It excludes two domestic subsidiaries i.e. Moneygoals Solutions Limited and Banayantree Services Limited, which were acquired during FY 2024-25, as well as all the offshore subsidiaries. These entities will be considered for inclusion in future reporting cycles.

Data collection methodology

This report has been prepared in alignment with GRI Standards 2021, SEBI's BRSR and UN's SDG. The data presented in this Sustainability Report has been compiled through a combination of internal records, verified management systems and inputs from relevant departments across the Organisation. Where estimates or assumptions were necessary, a conservative and transparent approach is followed and the said estimates or assumptions are clearly specified. All reported information reflects performance for the reporting period, unless stated otherwise and aligns with applicable sustainability reporting frameworks.

External Assurance

An independent external assurance was carried out by Rathi & Associates, practicing company secretaries, for Reasonable Assurance on the BRSR Core Key Performance Indicators (KPIs) and Limited Assurance on other non-financial disclosures which formed part of BRSR for FY 2024-25. The Independent Assurance Statement also details the scope and methodology adopted, thereby strengthening the reliability and transparency of the BRSR disclosures. The BRSR for FY 2024-25 with Independent Assurance Statement is available on the website of the Company at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_WAM_BRSR_FY_2024_25_a2b6178b82.pdf.

Forward-Looking Statement

This document may contain forward-looking statements and information. Such statements are based on our current expectations and certain assumptions and are therefore subject to certain risks and uncertainties. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary. 360 ONE WAM LIMITED does not intend to assume any obligations to update or to revise these forward-looking statements in light of developments, which differ from those anticipated.

Stakeholder Feedback

360 ONE would appreciate feedback and insights on the contents of this report, as it would help in improving its efforts, performance and policies. For feedback and queries please write to us at sustainability@360.one.

Strength – Our Foundation of Trust

FY 2024-25 was a year of purposeful expansion, resilient performance, and deepening client trust. At 360 ONE, we demonstrated what happens when bold ambition is backed by steady hands. Real strength lies in a clear vision and the discipline to see it through.

We serve more than portfolios; we serve people - families, entrepreneurs, and institutions who entrust us with their wealth and futures. For us, wealth is the product of foresight, sustained effort, and lasting impact. Our strength lies in being dynamic and future-ready.

About Us

Comprehensive platform for India's wealth creators

360 ONE is one of India's leading wealth and asset management firms, catering to UHNI, HNI, institutional and emerging affluent clients. It delivers tailored investment solutions and long-term value to all stakeholders, helping them grow, optimise, preserve, and pass on their wealth and legacy. Our products, platform, cutting-edge advisory offering and client engagement-first philosophy have positioned us at the forefront of India's evolving wealth landscape.

360 ONE operates a robust ecosystem of businesses that together offer integrated, yet customisable financial solutions, from long-term portfolio planning to niche asset classes and credit solutions.

ESG Vision

360 ONE’s vision is to be a leading Wealth and Asset Management company and integrate ESG in its operations, governance and business practices with a 360-degree approach for providing best in class, bespoke services to its

esteemed clients, for creating long term value for all stakeholders, with care for environment, wellbeing of employees and meaningful contributions to society.

Purpose

At 360 ONE, we understand that our clients seek long-term performance that withstands the test of time, including economic fluctuations and unforeseen events. Additionally, our commitment to our clients is beyond mere numbers. It is a personalised experience tailored to each client’s unique needs. We take immense pride in the deep relationships we

cultivate, as our clients have played a pivotal role in establishing us as market leaders. We dedicate ourselves to understanding our clients’ goals on a profound level, crafting investment strategies that align with their individual aspirations. Our ‘client-first’ approach permeates every aspect of our operations, ensuring that we are always on, proactive and transparent.

Our Values

Client First

We place our clients’ interests at the centre of every decision. Their trust drives our purpose.

Ownership Mindset

We act with intent and accountability, from strategy to execution.

Integrity

We uphold the highest standards of ethics, transparency and fairness.

People-led Culture

We foster respect, collaboration, and inclusion at every level.

Adapt and Advance

We respond to change with agility and a forward-thinking approach.

Disciplined and Diligent

We make decisions grounded in insight, risk-awareness and rigor.

Steering the Future with Sustainable Actions

Dear Stakeholders,

The Sustainability Report for FY 2024-25 comes at a pivotal moment, as India's strong economic growth creates new avenues for progress and shared prosperity. This momentum provides an opportunity to shape a future that is not only prosperous but also resilient and inclusive. At 360 ONE, we have consistently been committed to delivering long-term performance for our clients, even in the face of challenges. This year was no exception, as we continued to broaden our footprint within the emerging and mass affluent segments through the acquisitions of ET Money and B&K Securities.

As one of India's leading wealth and asset management firms, 360 ONE recognises its responsibility to contribute meaningfully to this evolving landscape, creating long-term value while fostering sustainable growth for all stakeholders. Our sustainability strategy is underpinned by a strong governance framework that guides our actions and decisions. At its core is a Board-approved ESG Policy that outlines our approach to Environmental, Social and Governance (ESG) aspects. ESG oversight is provided by our Corporate Social Responsibility (CSR) and ESG Committee, which reports to the Board and is entrusted with reviewing and monitoring our sustainability goals and ESG initiatives.

We have embedded ESG into our strategic roadmap through a rigorous materiality assessment process aligned with global and national sustainability standards. Through structured stakeholder engagement and internal reviews, we identified and refined twelve material topics most relevant to our business and stakeholders. These include responsible investment, climate strategy, data privacy, governance and stakeholder relationships, forming the foundation of our ESG initiatives, disclosures and long-term value creation.

Our commitment to sustainability extends beyond operational excellence. Social responsibility is deeply embedded in our culture and is championed by the 360 ONE Foundation. Through its CSR initiatives, 360 ONE actively supports environmental restoration projects, including agroforestry and native plantation programmes aimed at rejuvenating 70 acres in Kanha. We are particularly focused on bridging the gap between the informal and formal sectors by equipping India's youth and micro-entrepreneurs with essential skills, financial literacy and improved financial access.

During FY 2024-25, over 82% of our employees have participated in skill enhancement programmes, upholding our focus on continuous growth. Our emphasis on employee well-being and a supportive culture is further demonstrated by a 100% return-to-work rate following parental leave.

Further, a robust three-tier governance framework ensures early identification and mitigation of risks, supported by dedicated teams across Wealth, Asset Management, and Lending functions. With seventeen key risk parameters tracked quarterly by Board-level Risk Management Committees, our

Our sustainability strategy is underpinned by a strong governance framework that guides our actions and decisions. At its core is a Board-approved ESG Policy that outlines our approach to environmental, social and governance (ESG) aspects.

enterprise-wide approach reinforces resilience, regulatory compliance, and long-term value creation. Our commitment to transparency and ethical conduct is further reinforced through mechanisms such as an independent third-party ethics helpline.

For us, sustainability is a journey that is defined by continuous improvement and impact. We evaluate our success not only through financial performance but also by the value we create for society and the environment. We remain steadfast in our commitment to driving meaningful change and fostering a more sustainable, inclusive and equitable future.

Thank you for your continued trust and support.

AKHIL GUPTA
Chairman, 360 ONE WAM LIMITED

In Pursuit of a Better Tomorrow, Together

Dear Stakeholders,

At 360 ONE, we continue to move forward with purpose, creating value that extends beyond financial success. Guided by a vision of progress that benefits all, our approach to sustainability is centred on collective growth and meaningful impact. We believe true performance is measured not only in numbers but in the positive difference we create in people's lives, communities and the world we share.

Our team of over 1,400 experienced professionals diligently manages the wealth and assets of over 7,500 ultra-high-net-worth and high-net-worth families across India, spanning various wealth segments. As an industry leader, we oversee client assets worth approximately ₹5,81,498 Crores (as of March 31, 2025). Our focus remains steadfast on delivering measurable outcomes and driving continuous improvement. This report underscores our commitment to translating ESG principles into tangible, real-world impact through environmental stewardship, social empowerment, financial inclusion and strong governance.

We are proud to be recognised as a "Great Place to Work 2025®" and "Best Workplaces™ in Investments – India 2025", a reflection of our strong culture, inclusive values and people-first approach. While we remain fully committed to diversity and equal opportunity, with gender diversity currently standing at 30%, we have equally championed environmental stewardship through responsible practices.

In FY 2024-25, ~81% of our electricity consumption

was sourced from green energy, and 100% of the waste generated at our corporate office in Mumbai was recycled. We have consistently adhered to environmental compliance, further reinforcing our promise to contribute to a better tomorrow.

We made remarkable strides in operational efficiency and digital transformation. ~97% of clients were onboarded digitally, with over 4,200 forms e-signed compared to just 137 physical signings. Robotic Process Automation (RPA) and intersystem APIs have delivered a combined improvement of 8 hours in turnaround time, along with daily efficiency gains of 16 hours. In the Asset Management vertical, AIF onboarding is now 80% digital, PMS is nearing 50%, and over 90% to 95% of mutual fund transactions are processed digitally, enhancing convenience and sustainability. In Wealth vertical, onboarding is fully digital via eSign, with adoption rates of 98% for individual clients and 93% for non-individual clients.

Sustainability is embedded across all our strategies, including Private Equity, Credit, Real Estate and Public Equity, each guided by tailored approaches designed to manage ESG risk and drive long-term value.

We uphold robust cybersecurity through board-level oversight, expert monitoring and continuous training to ensure resilience, compliance and trust. Our digital initiatives, including AI-driven analytics and voice-to-text tools, enhance efficiency, improve client experience and support our sustainability goals. We are also pleased to share that we recorded no instances of corruption, bribery, violations of conflicts of interest / data privacy policies, reaffirming our unswerving dedication to integrity.

Our CSR interventions continued to create meaningful impact in the year under review. Across more than 15 states, we directly impacted 21,900

As an industry leader, we oversee client assets worth approximately ₹5,81,498 Crores (as of March 31, 2025). Our focus remains steadfast on delivering measurable outcomes and driving continuous improvement.

lives, bringing our cumulative outreach to over 1.69 Lakhs lives since FY 2021-22. Our outcome-focused approach has driven a 4.05x increase in beneficiary incomes over two years, 4.58x more capital beyond initial grants and reached 3.73x more beneficiaries. These results highlight the strength of our blended finance and catalytic funding strategies, driving systemic, long-term change.

As we move ahead, we remain committed to advancing our sustainability journey through decisive action, measurable outcomes and purposeful partnerships that align with India's broader development goals. We value your continued trust and partnership as we work together to create a more resilient and inclusive future.

Thank you,

KARAN BHAGAT
Founder, MD & CEO,
360 ONE WAM LIMITED

Guiding Principles for a Sustainable Future

Governance is more than compliance, it's our compass. We lead with integrity, accountability and transparency to uphold stakeholder trust.

ANSHUMAN MAHESHWARY
STRATEGY & GOVERNANCE

Every client relationship is built on trust, transparency and purpose. By blending digital innovation with personal engagement, we create lasting value for our clients.

PANKAJ FITKARIWALA
OPERATING FUNCTIONS

360 ONE recognises that ethical practices are crucial in building trust with clients, regulators and the community at large. 360 ONE prioritises ethical conduct and sound governance for sustainable organisational success. 360 ONE's operations are marked by transparency, fairness, integrity and accountability. A well-defined code of conduct guides and encourages employees to meet ethical standards and make ethical decisions with a client centric approach.

360 ONE follows high standards of governance and disclosure. It firmly believes that adherence to business ethics and commitment to corporate governance will help 360 ONE to achieve its vision of being the most respected and trusted wealth and asset management company in the financial services space in India. The Company's corporate governance disclosures are described at length in the 'Corporate Governance' section of our Annual

Report for the financial year 2024-25. The said report is available at the website of the Company at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_WAM_CG_Report_FY_2024_25_746a95b6d9.pdf

Corporate Governance Framework

The Board of Directors ("**Board**") of the Company represents an optimal mix of expertise, knowledge and experience. Further, the Independent Directors on the Board of the Company are respected for their professional integrity as well as rich experience and expertise. The Board provides leadership, strategic guidance and discharges its fiduciary duties of safeguarding the interest of the Company and its stakeholders. The Committees of the Board also play an important role in the governance framework of the Company and are constituted to deal with specific matters as prescribed under applicable laws and as may be referred by the Board.

ESG Governance Structure

The Governance structure as specified in the Environment, Social and Governance (ESG) Policy of the Company which is available at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_ESG_Policy_1efe8af86a.pdf

The Corporate Social Responsibility (CSR) and Environment, Social, and Governance (ESG) Committee reports to the Board, inter alia overseeing the review and monitoring of sustainability goals and ESG initiatives. The committee is chaired by Mr. Yatin Shah.

Composition of Board Directors

The composition of the Board as on September 30, 2025, along with the details of the Directors of the Company are as follows.

Mr. Akhil Gupta

Chairperson and
Independent Director

Mr. Karan Bhagat

Managing Director

Ms. Revathy Ashok

Independent Director

Mr Pierre De Weck

- Technology led transformation
- Growth and New Business Build

Board Committees

- Audit Committee
- Risk management Committee
- Corporate Social Responsibility and Environment, Social and Governance Committee
- Nomination and Remuneration Committee
- Stakeholders Relationship Committee
- Information Technology Strategy Committee

The Nomination and Remuneration Committee of the Company has ensured diverse combination of members in terms of age, gender, experience, nationality, expertise and other discipline related to the business, in the Board of the Company.

Board Selection

The Nomination and Remuneration Policy (which is available at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/Nomination_and_Remuneration_Policy_final_358d1ccb4f.pdf) serves as a guide for appointing Directors, Key Managerial Personnel and Senior Management of the Company which prescribes that the candidate should possess adequate qualification, expertise and experience for the position he / she is considered for such appointment. The said Policy also specifies detailed procedure for appointment of the Managing Director or Whole-Time Director, Key Managerial Personnel and Senior Management of the Company.

The Nomination and Remuneration Committee also ensures that appointment of Directors is in line with the Board Diversity Policy of the Company (which is available at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_WAM_Board_Diversity_Policy_2128104aaf.pdf).

Board Functioning

Meetings of the Board

The schedule of the Meeting(s) of the Board and Committees for the entire financial year are finalised in consultation with the Directors of the Company and the same is communicated to them at the start of the respective financial year. The Board meets at least once every quarter to review financial results and discuss other matters on the agenda. Additional meetings are scheduled as required, and in urgent situations, resolutions may be approved by circulation, with details recorded in the subsequent meeting.

Notice and Agenda

The Board and the Committees are presented with detailed notes, along with the agenda papers to enable Directors to take informed decisions. With a view to leverage technology and reducing paper consumption, the Company has implemented app based e-meeting system, which can be accessed through secured devices.

Compliance Reporting

The Board periodically reviews compliance reports of laws applicable to the Company, prepared and placed before the Board by the management. The Board is also periodically updated on relevant and important regulatory requirements and the action plan for adherence to the same.

Post-Meeting Follow-up Mechanism

The Company has a process for effective follow-up, review and reporting for the decisions taken and actions suggested by the Board and the Committees. The important decisions taken at the Board / Committee(s) Meeting(s) which call for actions to be taken by the management, are communicated to the concerned departments, followed up from time to time and are updated to the Board / Committee with an implementation status.

Board Performance Evaluation

The Nomination & Remuneration Committee has laid down the criteria for performance evaluation of Chairperson, Managing Director, Non-Executive Directors, Independent Directors, Committees and Board as a whole. This annual evaluation process assesses effectiveness of the functioning of the Board and the Committees against defined criteria. The results are reviewed by the Nomination and Remuneration Committee and recommended to the Board, which gives its feedback on areas of improvement to the Directors and management as may be necessary. The evaluations are conducted digitally to promote paperless operations and anonymously to promote integrity and effectiveness of the process.

Familiarisation Program

(i) Initial Familiarisation:

For the newly appointed Directors, the Company provides an induction kit which includes brief introduction about the Company, its history, corporate structure, subsidiaries, their business, its key policies etc. The Company also arranges orientation programmes i.e. meetings between the Independent Directors and senior management of the Company to discuss the functioning of the Board and Committees, business segments and their performance, risk management frameworks of the Company and its subsidiaries in detail.

(ii) Continuing Education Process:

The Managing Director, senior management and other business heads make presentations to the Board to familiarise the Non-Executive Directors with the strategy of the Company, its plans and budgets, financial and operating performance, risk management frameworks, regulatory updates and overview of business activities on a regular basis and key developments in external business environment which affect the Company, its subsidiaries and the industry as a whole.

Further

- Strategy Meet for the members of the Board was held on May 15, 2025, where Board discussed the strategy of the Organisation, its business segments and key control functions. The Board's inputs were well received by the management to shape up the mid-to-long term strategy of the Company; and
- Board Learning Day for the members of the Board was held on September 3, 2024, where Board was presented on new age topics such as Generative Artificial Intelligence (GenAI), Innovation, trends on Alternatives in asset management and branding strategies.

Green Initiatives in Corporate Governance

In line with the 'Green Initiative' and relevant regulatory provisions, the Company has adopted electronic distribution of the Notice of Annual General Meeting, Postal Ballot communications and the Annual Report to shareholders whose e-mail addresses are registered with their Depository Participants (DPs) and are available with National Securities Depository Limited (NSDL) or Central Depository Services (India) Limited (CDSL).

The Company continues to encourage shareholders to register for digital communication, reducing paper consumption, ensuring faster delivery of information, eliminating the risk of loss in transit and facilitating convenience.

Tax Policy and Governance

360 ONE is focused on responsibly managing its economic, environmental and social impact on society, including indirect value creation, with adherence to high ethical standards. 360 ONE's Tax Policy and Governance reflect its endeavour of

being a responsible corporate citizen, outlining its approach towards taxation. It ensures compliance with relevant tax laws and regulations in all operating countries to avoid tax risks and inefficiencies in the implementation of business decisions.

This includes timely payment of legally required taxes, utilising tax agreements and reliefs provided by relevant governments and engaging with tax authorities during audits.

Transparency is maintained by promptly providing requested tax-related information to establish accurate tax liabilities. The Organisation maintains open and transparent tax structures within the boundaries of rules and regulations and aligns Tax Policy and Governance with its business and commercial strategies. Personnel responsible for tax matters receive appropriate training and access to external experts to fulfil their tax responsibilities effectively. The said policy is available at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_WAM_Tax_Policy_fe6bc1d43b.pdf.

At 360 ONE, transparent and robust financial disclosures form the foundation of our stakeholder engagement. We ensure clarity, timely adherence to applicable standards and ethical decision-making that strengthens stakeholder confidence. Guided by these same values, our approach to taxation reflects responsibility, compliance and integrity to drive sustainable value creation.

Risk and Opportunity Management

Balancing the Scales, Maximising Potential

360 ONE recognizes the importance of risk management as a vital function that equips the Organisation with the necessary tools to effectively address potential risks and to ensure stability and success of the Organisation.

360 ONE is committed to fostering a risk-aware culture and has prioritised the identification, assessment and management of risks across all operations.

The risk management framework of the Company is defined in the Board approved Risk Management Policy and it addresses the key foreseeable risks that the Company is likely to experience in the course of its business as well as mitigating factors that have been implemented to manage the said risks. The Company has in place a mechanism to identify, assess, monitor and mitigate various risks to key business objectives, which includes a risk management team at the Company level, and dedicated teams at key regulated businesses like Asset Management, Non-Banking Finance Business ("NBFC") and Broking, Distribution & Depositary Participant Business.

There is a Board level Risk Management Committee (RMC) of the Company, which looks at key risks across the Group; apart from that, there are Risk Management Committees for the Asset Management and Non-Banking Finance Businesses. The RMCs are responsible for developing a culture of risk awareness and educating the respective Board, management and employees about their responsibilities to identify risks and create a culture such that people at all levels manage risk. "Rigorous and Risk Conscious" is one of the six key values of the Organisation. Key risks are tracked through seventeen risk parameters across the Group that are presented to the RMC of the Company on a quarterly basis. That apart, there are risk metrics at a business level which are presented to the RMCs at the subsidiaries for Asset Management and Non-Banking Finance Businesses. Risk appetite is defined through a Red-Amber-Green (RAG) framework for reporting to the RMC, based on the severity of impact.

Key risks are identified, documented and discussed at the meetings of the Audit Committee, Risk Management Committee and Board of Directors of the Company. The key risks are addressed through mitigating actions on a continuous basis. The internal processes are designed to ensure adequate checks and balances and regulatory compliances at every stage. Authority matrices are defined flowing down from the Board of Directors, to provide authority to approve various transactions.

360 ONE proactively reviews and updates its Risk Management Policy and Framework to ensure its effectiveness in mitigating potential risks and emerging challenges in a business landscape that is dynamic and constantly evolving. The Risk Management Policy of the Company specifying the risk governance structure, key risks and mitigation measures, is available on its website at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_Risk_Management_Policy_4e19954861.pdf.

With a diverse range of services including Stock and Commodities Broking, Asset Management, Insurance Broking, Trusteeship and Family Office, Investment Advisory and Lending Solutions, it is imperative that the Organisation detects potential risks and opportunities and takes corrective action through efficient risk management practices.

Risk Governance Structure

360 ONE has in place adequate internal controls with reference to financial statements and operations. It has established a Risk Governance Structure comprising three levels across the Organisation to effectively manage risks.

First Level

The first level of risk management is carried out by frontline operations managers and sales personnel. They adhere to the rules, policies and procedures in their interactions with clients. By following these guidelines, they contribute to mitigating risks and ensuring compliance with regulatory requirements.

Second Level

The second level consists of dedicated risk management departments and committees. These teams are responsible for actively monitoring and assessing risks, implementing risk mitigation strategies and providing regular reports to senior management. Their role is to identify emerging risks, analyse their potential impact on the Organisation and develop appropriate measures to address them. They play a critical role in ensuring that risk management practices are embedded throughout the Organisation. Further, a Board-level RMC oversees the overall risk management framework. The RMC ensures that the risk management practices align with the Organisation's strategic objectives. It monitors and evaluates management practices and controls related to finance, operations, sector-specific risks, sustainability, as well as information and cybersecurity risks.

Third Level

Thirdly, to further strengthen risk management and assess the effectiveness of policies and process controls, internal audits are conducted. These audits assess, monitor and mitigate risks by reviewing processes, controls and practices within the Organisation. The Risk Management department assists in defining the audit's scope, oversees its execution and keeps tab on the resolution of open audit points. Internal Audit reports are presented to the audit committees by the Internal Auditors directly.

Risk Management is an essential element of our business strategy. One of our essential 6 core values is to be 'Rigorous and risk conscious'. One cannot expand a business and make it sustainable for the long term without a robust and independent risk management system that ensures that controls are effective and risks are anticipated, monitored and mitigated adequately, thereby creating long term shareholder value.

RAGHUVIR MUKHERJI
RISK - WEALTH MANAGEMENT

Risk Management Process

We have a Risk Management department that reports to the Chief Operating Officer and the Boards and/ or Audit Committees of the Company and its subsidiaries. Further, there are separate Risk Management heads for the Wealth, Lending and Asset Management businesses to focus on the risks pertaining specifically to those businesses.

Risk Management relies on the internal controls built into Standard Operating Procedures and the Risk Management, Product and Investment Policies relating to the various businesses: e.g.,

the Broking Risk Management Policy, the Mutual Fund (MF) Risk Management Policy, 360 ONE Prime Policies pertaining to Loan Against Shares, Loan Against Property and Unsecured Lending and Investment Manuals and Policies that exist for our NBFC and Asset Management businesses. Key risk metrics that track the principal risks faced by the various businesses are reported to the RMC at a group level, on the basis of certain pre-approved thresholds. This enables the RMC to monitor that risks are being managed at an acceptable level and prompt the Management to take action whenever things start going out of line.

Our risk management approach is built on timely insight and disciplined execution. Strengthening thresholds based monitoring and implementation of early warning signals helps us identify emerging risks and respond with clarity. This safeguards our platform while supporting informed, future- ready decisions.

AMARENDRA TEMBE
RISK - LENDING

Risk Management Process at Asset Management Business

SEBI has mandated a risk management framework for the mutual fund business. The asset management business has a risk management framework which covers the key risks to the mutual fund business, the AIF and PMS businesses. The Board level risk management committees at 360 ONE Asset Management Ltd. and 360 ONE Asset Trustee Ltd. are constituted as per the SEBI risk management framework. The terms of reference of these RMCs as defined by SEBI provide a governance structure to comprehensively review all risks pertaining to Investments, Operations, Technology, Compliance & Customer Service. The RMC of 360 ONE Asset Trustee Ltd. also reviews the risks of 360 ONE Alternate Asset Management Company Ltd. Risk appetite statement defines the risk thresholds (Red/Amber/Green) for reporting to the AMC & Trustee Board RMCs. The Chief Risk Officer (CRO) of the asset management business is part of the key internal committees viz. investment committee, valuation committee, technology committee and risk management committee. Technology Committee reviews the progress of Cyber audit, Information Security audit and Technology audit. Key observations from these audits, if any, are also submitted to SEBI with a timeline for remediation.

Risk Management Process at Lending Business

360 ONE Prime Limited has a Board approved Risk Management Policy and a Risk Appetite Statement which acts as a framework for identifying, assessing, measuring and reporting various elements of risk involved in the business.

360 ONE Prime Limited has constituted a RMC in accordance with the guidelines issued by

Reserve Bank of India. The RMC has overall responsibility of overseeing the risk management, approving risk measurement methodologies and appropriate policies and procedures across 360 ONE Prime Limited. The Chief Risk Officer (CRO) of 360 ONE Prime Limited, places his report on a quarterly basis before the RMC.

Risk Metrics

The RMC of the Company takes a proactive approach to monitor and measure risks by employing various metrics and systems. Firstly, key risk issues and regulatory updates are presented to the RMC, providing a comprehensive understanding of their potential impact on the different businesses within the Organisation. This allows RMC to assess the significance of each risk and determine appropriate mitigation strategies. Secondly, certain key risk metrics are presented to the RMC beyond certain threshold using Red-Amber-Green (RAG) framework. Thirdly, a management information system is implemented and presented to the Management Committees and senior management of the subsidiaries. This system aids in the identification, monitoring and mitigation of risks across the Organisation. The RMC of the Company reviews the risks at the Company and at the subsidiary level through risk metrics reporting. Risk incidents originating at the subsidiary and classified as RED are reviewed by the RMC apart from them being reported to the RMCs of the subsidiaries, as applicable. By utilising these metrics and management information systems, RMC enhances its ability to track risks, evaluate their potential impact and implement necessary measures to mitigate them. This proactive approach helps to safeguard the Organisation's operations, protect stakeholders' interests and ensure the stability and success of the business.

We have strengthened our ERM ecosystem by integrating ESG considerations and enhancing oversight through a multi-tier governance model, ensuring we are better prepared for emerging risks and positioned for sustainable growth.

PRAVIN NADGOUDA
RISK - ASSET MANAGEMENT

Audit

The scope of internal audit covers all aspects of business including regular front-end and back-end operations, HR, Finance, customer service, IT and checking for both regulatory and internal compliances. Internal audit team conducts risk-based audits across various processes. They also assess the state of internal financial controls and provide their opinion.

360 ONE has ensured that its internal audit and control systems are adequate and commensurate with the nature of business, regulatory prescriptions and the size of its operations.

The Internal Audit of the Company and subsidiaries is conducted by an external and independent firm, as per the scope suggested by Audit Committee(s) of the Company and its subsidiaries and approved by the respective Boards. In the case of 360 ONE Prime Limited, from FY 2022-23, it is being conducted by a Head-Internal Audit, as per RBI guidelines with the assistance of external auditors.

For FY 2024-25, Internal Auditors tested the design and effectiveness of the key controls and no material weaknesses were observed in their examination. The internal audit reports are directly presented to the respective Audit Committees by the Internal Auditors. In addition, the Organisation complies with the several specific audits mandated by regulatory authorities such as SEBI / Stock Exchanges / Depositories and the reports are periodically submitted to the regulators.

Further, statutory auditors verified the design and implementation of controls and tested their operating effectiveness for material transactions, account balances and disclosures and have confirmed that they did not have any significant or material observation in relation to deficiencies in design and / or effectiveness of controls. The Audit Committee of the Company also holds one-on-one sessions with the statutory auditors of the Company.

ESG Risks

360 ONE recognises the nexus between its business and the economic prosperity of the country, which is influenced by various factors such as climate change, pollution and other health and social issues and other ESG

parameters. The Organisation understands the significance of these factors and the challenges they present. Therefore, one of the key risks tracked through seventeen risk parameters across the Group as aforesaid include ESG risk.

Business Continuity and Disaster Recovery

360 ONE has established a comprehensive Business Continuity and Disaster Recovery (BCP/DR) Plan across the Organisation. This plan encompasses multiple facets, including disaster management, mitigation and preventive measures, all aimed at ensuring uninterrupted business operations.

A key component of the BCP/DR Plan is the formation of a Business Continuity Crisis Management Team (BCCMT). The BCCMT comprises individuals who have specific roles and responsibilities within the Team. These members are tasked with invoking the BCP and leading the recovery efforts in times of crisis. Their functions include assessing the situation, coordinating response actions, communicating with stakeholders and overseeing the restoration of operations.

The BCP/DR Plan incorporates a business impact analysis process, which helps identify critical functions and systems, assess potential risks and determines the maximum tolerable time required to restore business operations. It also specifies the maximum tolerable time for acceptable data loss to ensure data recovery aligns with business needs.

The plan also addresses backup arrangements for various systems, including data backup and recovery strategies. It outlines provisions for remote working, such as work-from-home arrangements and the necessary IT infrastructure support to facilitate remote operations. It clearly indicates the details of key contacts who need to be notified when the BCP/DR is invoked, ensuring efficient communication and coordination during crisis situations.

Business Ethics

360 ONE is guided by integrity, transparency, and accountability across all our operations and relationships. Our governance and compliance framework ensures that we conduct business in accordance with applicable laws, regulations, and the high standards of professional conduct.

Through well-defined policies, we maintain an environment of transparency, trust and fairness. Regular awareness sessions and training programmes reinforce our ethical culture, enabling employees to identify, prevent, and report any unethical or non-compliant practices. We believe that sound governance and ethical business conduct are critical to sustaining stakeholder confidence and long-term value creation.

Oversight of adherence to such policies rests with Board-level committees, supported by Chief Human Resource Officer, Chief Risk Officers, Compliance Officers and Internal Auditors.

Anti-Money Laundering Policy

Anti-Money Laundering ("AML") Policy of 360 ONE provides a framework, which helps the Organisation to develop procedures that are appropriate to its business and maintain uniform practices to ensure that the Organisation adheres to the minimum requirement laid out by Securities and Exchange Board of India in this regard. The AML Policy also provides clarity on Know your Customer (KYC) standards and AML measures, outlines the obligations of 360 ONE under Prevention of Money Laundering Act, 2002 (PMLA) and align its operations with international standards and practices. This policy broadly covers distribution, advisory, broking, depository participant, investment banking and trust services businesses. The annual trainings to concerned employees also include trainings on AML. 360 ONE has AML Committees for various businesses to deliberate on client onboarding. The said policy is available at <https://www.360.one/wealth/dsl/documents/AML-Policy-April2024.pdf>

Anti-Corruption

360 ONE has a zero-tolerance approach to bribery and corruption and is committed to act professionally, fairly and with integrity in all the dealings wherever the Organisation operates. The Organisation is also committed to implement and enforce effective systems to counter bribery. To combat corruption and to conduct our business in an honest and ethical manner, 360 ONE has adopted anti-corruption policy, which is applicable to all the employees, including directors of the Company. The parties who fail to comply with the policy will be charged with disciplinary action and both the offender and the Organisation may face legal or regulatory action.

The Organisation also conducts training on anti-bribery for key managerial personnel and concerned employees. In FY 2024-25, no disciplinary actions were taken against directors, key managerial personnel and employees for the charges of bribery / corruption. The said policy is available at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_Anti_Corruption_Policy_5eafee0c76.pdf

Policy on Vigil Mechanism and Whistle Blower Mechanism

360 ONE is committed to developing a culture where all its stakeholders, including employees, vendors, directors, suppliers, service providers, contractual staff, feel secure about raising concerns with respect to any poor or unacceptable practice and any event of misconduct. To ensure this, 360 ONE has a Policy on Vigil Mechanism and Whistle Blower Mechanism which provides for nature of issues covered, available reporting channels to report an incident, steps along with expected timelines for resolving concerns reported and measures available to safeguard against victimization of the whistle blower who avails of such mechanism. To facilitate reporting of any concerns without any hesitation and maintaining of anonymity, the Company has engaged an external independent third party agency for managing ethics helpline under the aforesaid mechanism. 360 ONE also conducts training on whistle blower mechanism for key managerial personnel and employees.

The said policy is available at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_Policy_on_vigil_mechanism_and_whistle_blower_mechanism_2dd3b3dff3.pdf

Best Practices at 360 ONE

- An external independent agency has been appointed for receiving and monitoring Whistleblowing complaints, allowing multiple channels to raise concerns, including a 24X7 helpline
- Available in local languages
- Available to employees, suppliers, customers and other third parties
- Investigation by a Vigilance Committee consisting of multi-functional senior management personnel
- Disclosure on the number of reports received the types of misconduct and measures taken
- Non-retaliation policy
- Anonymous reporting, treated confidentially
- Proactively communicated to employees
- Structures in place to process whistle blower report
- Quarterly reporting of any whistle blower complaint(s) to the Audit Committee
- Accessibility of ethics helpline through phone, e-mail, web portal, post box and Quick Response code.

Prevention of Sexual Harassment of Women at Workplace

At 360 ONE, we uphold a workplace culture that ensures dignity, respect and equality for all. In line with The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013, we have adopted a comprehensive Policy on Prevention, Prohibition and Redressal of Sexual Harassment of Women at the Workplace.

The said policy applies to all employees, contractual staff, trainees, associates, and visitors across our offices in India. It outlines clear definitions, procedures for complaint and redressal, and safeguards against retaliation and victimisation. An Internal Committee (IC) is in place to investigate and resolve complaints within defined timelines while maintaining strict confidentiality. Regular awareness sessions and training is provided to all employees to create awareness about their rights and responsibilities in maintaining a safe and respectful workplace. Read more at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_Prevention_of_Sexual_Harassment_and_Complaint_Procedure_Policy_58379bedc2.pdf

Code of Conduct and Business Ethics

The Company has adopted Code of Conduct for board and senior management under SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The said Code is adopted to ensure that the directors and the senior management maintain high ethical standards and transparent process in managing the affairs of the Company, to sustain the trust and confidence reposed by the shareholders of the Company. Recognising the importance of maintaining a reporting mechanism, our Code of Conduct for board and senior management empowers them to report any violations or suspected violations directly to the chairman of the Audit Committee / Board. Read more at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/Code_of_Conduct_0c6744e50e.pdf

360 ONE has put in place Code of Conduct for employees (as part of 'Workplace Guide' available on the intranet) which inter-alia focuses on best employment practices and respecting the human rights of the employees, avoids causing or contributing to adverse human rights impact, and addressing such impacts as and when it occurs. The said Code of Conduct is in adherence to the regulatory and business requirements.

Conflicts of Interest

A conflict of interest arises when an employee's personal interests' conflict with that of the Organisation or its clients, or the interests of

the Organisation conflict with the interests of 360 ONE's clients. To manage such conflicts of interest and ensure that conflicted transactions take place in a fair manner, all the related party transactions are approved by the Audit Committee / Board and reporting and disclosures requirements are complied with, as per the requirements of the Companies Act 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. 360 ONE also has a Conflicts of Interest Policy under which a Conflict Resolution Advisory Board (CRAB) is constituted to approve other conflicted transactions. The Conflicts of Interest Policy lays down a framework for conducting business and operations with guiding principles of fair practice and risk mitigation for resolution of potential and actual conflict of interest. Read more at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_Conflicts_of_Interest_Policy_4a6c693c77.pdf

Investor Grievance Redressal Framework

The Company has established an investor grievance redressal framework in order to ensure that (a) all investors are always treated fairly and without bias and (b) investors are made aware of their rights so that they can opt for alternative remedies, if they are not fully satisfied with the Company's response or resolution to their complaint. Read more at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_IGR_Framework_5820b13a8f.pdf

The said framework broadly covers the processes for receipt, resolution and escalation of grievances as may be raised by the investors of the Company. In FY 2024-25, all investor grievances were resolved well within the statutory timelines.

Prevention of Insider Trading

360 ONE has formulated and adopted 'Code of Conduct for Employees and Insiders of 360 ONE WAM LIMITED and its Subsidiary & Associate Companies' under SEBI (Prohibition of Insider Trading) Regulations, 2015, for prevention of the insider trading.

The aforesaid Code of Conduct constitutes the body of rules and principles, which are to be followed by employees including designated persons and insiders of 360 ONE WAM LIMITED and its subsidiaries. As part of our ongoing commitment to promote ethical behaviour and compliance, annual training is provided to all employees on prevention of insider trading and compliance with the aforesaid Code of Conduct. Furthermore, the Board of Directors of 360 ONE has formulated a Code of Conduct for fair disclosures which is required to be adhered to by all the people who are directly or indirectly associated with the Organisation. Read more at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_WAM_Code_of_Fair_Disclosure_of_UPSI_ab7cf292fc.pdf

Gift Policy

360 ONE Gift Policy establishes clear guidelines to prevent any form of undue influence or conflict of interest arising from the exchange of gifts. It prohibits acceptance or offering of gifts that may compromise ethical standards or business judgment. The policy ensures transparency, aligns with anti-corruption principles, and reinforces the Organisation's commitment to integrity in all interactions. Read more at https://x-docket.360.one/ir-assets/360ONE_Gift_Policy.pdf

Integrity is foundational to how we operate at 360 ONE. Our governance framework is designed to ensure clear accountability, strong ethical conduct, and consistent compliance across businesses supported by independent oversight, transparent processes, and accessible redressal mechanisms for all stakeholders.

SANDEEP JOSHI
LEGAL

Stakeholder Engagement

Understanding Diverse Needs to Build a Sustainable Future

As per the GRI framework, stakeholders are individuals or entities that may be significantly affected by an organisation's activities, products, or services, or whose actions may influence the organisation's ability to implement its strategies and achieve its objectives.

360 ONE recognises that its operations are shaped by a diverse group of stakeholders, including customers, employees, investors, regulators, and peers. The organisation places strong emphasis on understanding and addressing stakeholder needs and expectations in a transparent and ethical manner to foster long-term relationships.

Through proactive stakeholder engagement, 360 ONE ensures alignment with stakeholder expectations, thereby helping to manage potential risks and strengthen its reputation in the market.

Our Engagement Framework

Translating expectations into reality

Stakeholder Group	Identified as Vulnerable and Marginalised Group	Channels of Communication	Frequency of engagement	Purpose and Scope of engagement including key topics and concerns raised during such engagement
 Customers	No	→ Regular business interactions through sale and service teams → Customer feedback surveys → Customer grievance channels → Periodic press releases and media interactions programmes → Social media	→ Regularly → Need basis	→ Customer service and feedback → Redressing customer grievances → Providing information regarding products and services
 Shareholders and Investors	No	→ Stock Exchange intimations → Investor Presentations → Organisation Website → General meetings / postal ballots → Annual Report / Sustainability Report → Investor/Analyst meets/ calls → Media releases	→ Need basis → Quarterly / Half Yearly / Annually	→ Financial performance → Business updates
 Employees	No	→ Leadership and HR outreach → Performance reviews → Feedback Surveys → Intranet portal → Town Halls → Learning and Development programmes → Whistle-blower mechanism → POSH mechanism	→ Need-based → Annual	→ Employee productivity → Talent management → Learning and development → Annual performance management → Yearly reward and recognition programme → Employee wellbeing → Sense of ownership and alignment to the Organisational vision & mission

Stakeholder Group	Identified as Vulnerable and Marginalised Group	Channels of Communication	Frequency of engagement	Purpose and Scope of engagement including key topics and concerns raised during such engagement
 Service Providers / Value Chain Partners	No	→ Meetings → Phone/email	→ Need-based	→ Periodic assessments → Service issues and discussions

 Regulators	No	→ Meetings → Statutory filings → Written communication	→ Quarterly/ Half-yearly/ Annually → Need-based	→ Regulatory compliance → Corporate governance → Financial performance
 Communities and NGO	Yes*	→ Meetings → Conferences → Workshops → Phone/Email → CSR Partnerships	→ Need basis	→ Baseline and need assessment surveys → Community engagement programmes → Monitoring and Evaluation

* Our CSR programmes are designed to benefit beneficiaries from marginalised and vulnerable backgrounds.

Materiality Assessment

Mapping our sustainable journey ahead

360 ONE embarked on its ESG journey by leveraging stakeholder engagements and materiality assessment to determine key material topics. 360 ONE conducted its first materiality assessment with internal and external stakeholders in FY 2021-22. In FY 2023-24, senior management carried out an internal review to further refine the material topics to ensure continued strategic alignment.

360 ONE WAM Approach and Process

Mapping ESG Performance to Material Issues

Topics	SDGs Impacted	Performance
--------	---------------	-------------

Environment

Responsible Investment and Product Innovation	  	→ 46.5% of Private Credit AUM channelled into ESG-positive sectors → Launch of category-first funds across Private Equity, Private Credit, and Real Assets → Expanded investor participation through ESG-focused offerings
Climate change strategy		→ Strengthened waste recycling and eco-friendly practices to limit environmental impact
Carbon footprint	 	→ Scope 2 emissions minimised via ~81 renewable electricity consumption sourced from green energy → Bengaluru and Gurugram offices operating from zero-carbon, LEED-certified buildings

Social

Customer relationship management	Not applicable	→ Net Promoter Score of 63 → Reduced client query TAT to 3.4 days → Open architecture investment model → Product Approval Committee (PAC) aligned with Asset Allocation Committee (AAC) → Risk profiling aligned with client objectives
Talent management, employee engagement, work culture	 	→ 82% employees received skill upgradation training → 100% return-to-work rate post parental leave; 92% retention rate → Certified as "Great Place to Work 2025®" and "Best Workplaces™ in Investments - India 2025"
Human rights, diversity & inclusion and equal opportunity	  	→ Gender diversity at 30% → 100% offices assessed for child labour, forced labour, and discrimination → Equal Opportunity & Diversity Policy in place

Topics	SDGs Impacted	Performance
Social		
Health and Safety		→ Zero work-related injuries → Annual company-sponsored health checkups for all employees → 100% employees covered under health and term insurance
Community development	   	→ Blended finance CSR model → 1.69 Lakhs beneficiaries impacted since FY 2021-22 → 4.05X impact leverage per rupee of grant
Governance		
Brand reputation, ethics, transparency and trust	Not applicable	→ 89% client satisfaction with investment product range → Independent third-party ethics helpline → 209 awards since inception
Data privacy and security		→ Zero data breaches or cybersecurity incidents → 100% employees trained in cybersecurity (incl. phishing simulations) → Regular vulnerability scans, penetration tests, and vendor risk checks
Enterprise Risk Management		→ ESG risks integrated into Risk Management Policy → Multi-tier risk governance framework in place → Conflict Resolution Advisory Board (CRAB) constituted → BCP Policy with regular testing
Legal and regulatory compliance and corporate governance		→ Board CSR & ESG Committee monitoring ESG initiatives → Board-approved ESG policy in place → Zero cases of corruption, bribery, conflict of interest, or data breaches

Stability – Prepared for the Next Chapter

Stability is key to ensuring sustainable growth and long-term value. stability across relationships, revenue, governance, and culture. We believe that true stability comes not from avoiding uncertainty, but from managing it with purpose, process, and prudence. In a world of flux, we remain focused on what endures: meaningful relationships, thoughtful investments, and legacies designed to last. At 360 ONE, strength and stability are

inseparable, and it is this balance that helps us turn uncertainty into lasting opportunity. We focus on managing the critical factors that drive our business, from effective risk management to fostering a culture of compliance and operational excellence.

Our ESG Roadmap

Charting the Blueprint for Responsible Growth

Sustainability is a journey, and we want to ensure we are moving in the right direction. If you have any feedback, big or small, we truly appreciate hearing from you at sustainability@360.one.

ROHIT BHASSE
CORPORATE SECRETARIAL & ESG

Client Relationship Management

Building Trust Through Intelligent Engagement

Client relationship management (CRM) at 360 ONE is designed to reflect the distinct priorities of our Asset and Wealth businesses. While the Asset division focuses on scale, digital enablement and operational consistency, the Wealth division prioritises advisory-led engagement, service excellence and client-centric feedback systems. Both approaches focus on transparency, compliance, and sustainability.

Client Relationship Management at Wealth Management

At 360 ONE Wealth, client service excellence is deeply aligned with our sustainability goals. By embedding digital-first practices, automation, and structured feedback loops, we ensure superior client experience while minimising environmental impact and strengthening long-term operational resilience.

Paperless and Digital Operations

We have transitioned key Wealth operations to digital platforms, significantly reducing paper usage and enhancing client convenience.

Mutual Funds (MF)

Transactions for execution-only clients are executed online via BSE Star MF and the NSE Mutual Fund Platform. While not fully implemented for all transactions, usage of these platforms is actively promoted to reduce reliance on paper-based processes.

AIF & PMS

All individual Alternative Investment Fund (AIF) transactions are mandatorily processed digitally, with physical submissions permitted only under exception approval. PMS onboarding has similarly moved to digital channels, minimising paperwork and courier dependency.

Client Onboarding

Onboarding is now made fully digital using eSign solutions, with adoption rates of 98% for individual clients and 93% for non-individual clients. Quarterly MIS reviews track progress to maintain compliance and efficiency.

Impact

Reduced reliance on paper and logistics, faster execution, enhanced transparency, and improved client convenience.

Efficiency Through Automation

Automation is a cornerstone of our Wealth CRM framework. Routine high-volume tasks such as client statements, scheduled reports, and communications are automated via Salesforce (SF) and the Client Event App, ensuring accuracy and timeliness. System reviews are conducted regularly to continuously identify new automation opportunities, drive a digital-first service culture that reduces energy use and manual effort while freeing employees for higher-value activities.

Impact

Lower operational overheads, reduced manual errors, and improved productivity with measurable efficiency gains.

At 360 ONE, digital innovation is redefining client engagement. By embracing automation and paperless processes, we are enhancing transparency, reducing turnaround time, and creating a seamless experience for our clients.

JAPHIA WALKER
CLIENT SERVICES

Reduction of Manual Effort and Errors

We are developing a centralised Order Management System (OMS) to reduce human intervention and minimise transactional discrepancies. For HNI clients, the client app allows direct MF transactions, supported by automated updates for transparency and tracking.

Impact

Scalable operations, fewer errors, consistent experience, and reduced manpower requirements.

Excellence in Service

Our Service Excellence Program focuses on improving Turnaround Time (TAT), enhancing First-Time-Right (FTR) execution, and nurturing a digital-first mindset. Regular training sessions, cross-functional collaboration, and the creation of expertise hubs have elevated our service quality.

Impact

Stronger client trust, consistency across service touchpoints, and sustainable operational performance.

Client-Centric Feedback and Continuous Improvement

Client feedback mechanisms are deeply embedded across all Wealth CRM processes.

→ Every service email includes a feedback signature, allowing clients to share instant responses.

→ A dedicated query management team conducts service recovery calls for dissatisfied clients, ensuring closure and trust restoration.

→ Feedback trends are reviewed quarterly through MIS dashboards.

→ Net Promoter Score (NPS) surveys track long-term satisfaction metrics and improvement areas.

Result

FY 2024-25 recorded a 98% client satisfaction score, reaffirming the effectiveness of our service excellence model.

Sustainability and Long-Term Value

Through digital onboarding, paperless operations, automation, and structured feedback mechanisms, 360 ONE Wealth has significantly lowered its resource footprint while maintaining client-first responsiveness. These practices enhance client confidence, social trust, and operational resilience aligning business growth with sustainability objectives.

Client Relationship Management at Asset Management

At 360 ONE Asset, CRM is designed around digital enablement, operational efficiency, and transparent investor engagement. The approach balances sustainability with performance, offering clients a seamless experience that reflects both trust and technological innovation.

Our strength lies in listening to our clients and evolving with their needs. Through continuous feedback, service excellence, and a culture of accountability, we ensure every interaction drives satisfaction and delivers long-term value.

SITU TANK
CLIENT SERVICES

AIF and PMS Onboarding

Alternative Investment Fund (AIF) and Portfolio Management Services (PMS) onboarding have undergone significant digital transformation. The integration of Aadhaar-based e-signing with geo-location authentication has improved both security and user experience. Currently, AIF onboarding stands at 80% digital, with PMS approaching 50%.

Impact

Enhanced process integrity, reduced turnaround time, and lower environmental impact.

Customer Communication and Transparency

Communication with investors is proactive and multi-channel. Clients receive updates at every transaction stage via email and SMS notifications, ensuring clarity on timelines, risk disclosures, and process status. All product and pricing information is presented in a clear, standardised format to ensure informed decision-making.

Impact

Reinforced trust, improved information accessibility, and alignment with ethical communication practices.

Digital Enablement and Client Experience

Over 90–95% of Mutual Fund investments are processed through digital channels, ensuring convenience, transparency, and reduced environmental impact. Several innovations strengthen the client experience and promote financial inclusion.

- **Zero Balance Folio Creation:** Enables investors to begin investing without initial capital, fostering inclusive access.
- **Quick NFO Purchase Page:** Facilitates timely participation in new fund offerings.
- **Online Transfer of Units:** Enables end-to-end paperless transactions that reduce carbon footprint and saves time and efforts.
- **Digital KYC:** Ease of updating KYC records at investor's convenience.
- **Digital Timestamp:** Ensure compliance, transparency, and secure transaction records. Saves investor's/distributor's time and efforts of visiting branch at the same time helps meet the transaction cut off time.
- **Online Nomination and Distributor Link:** Strengthen family security and enhance assisted investing.
- **WhatsApp NEO Assistant:** Extends accessibility through a low-bandwidth digital assistant that supports continuous engagement.

Impact

Sustainable transaction practices, faster turnaround times, and improved investor convenience.

Continuous Improvement and Compliance Assurance

Salesforce-based data insights and client surveys form the foundation of performance tracking and improvement.

A Unified Ethos

Across both divisions, CRM is built on the same pillars of digital transformation, operational precision, ethical governance, and client trust. From Wealth's advisory-led engagement model to Asset's technology-led scalability, every initiative is designed to enhance transparency and strengthen the client experience.

By continuously learning from feedback, investing in automation, and upholding the highest standards of compliance, 360 ONE ensures that every client interaction reinforces its promise of integrity, innovation, and impact.

CRM effectiveness is measured through service experience scores, process efficiency ratios, and TAT metrics, monitored periodically via dashboards. The alignment of CRM practices with SEBI and internal compliance guidelines ensures transparent, fair, and responsible operations.

Impact

Measurable improvements in process quality, regulatory compliance, and client satisfaction.

Centralised Servicing, Satisfaction Tracking, and Grievance Redressal

All client interactions across MF, AIF, and PMS are managed through a central Salesforce platform, which monitors predefined categories, subcategories, and turnaround times. Any breach in TAT triggers root-cause analysis, targeted training, and process recalibration.

- A Standard Operating Procedure (SOP) governs query resolution (QRG), ensuring that every client concern is addressed within defined timelines.
- Client communications are closed-loop, providing interim updates and final closure notifications for full transparency.
- Regulatory updates are proactively communicated with clear guidance.
- Periodic training sessions keep teams aligned with SEBI and industry compliance norms.

Impact

Enhanced transparency, faster resolution, improved accountability, and consistent service quality across all touchpoints.

Operational Excellence

Smart Operations, Seamless Outcomes

Operational excellence is rooted in a culture of adaptability and automation, where innovation is not just a tool but a mindset. By driving change proactively and responsibly, we ensure that every improvement today contributes to a sustainable, resilient, and ethically sound tomorrow.

VIPUL GALA
OPERATIONS

Operational excellence is central to the execution of CRM across divisions. Robotic Process Automation (RPA) and intersystem APIs have delivered a combined improvement of 8 hours in turnaround time, along with daily efficiency gains of 16 hours through system automation and Power Query. These interventions have minimised errors, optimised resource use, and streamlined critical processes such as report reconciliations. Enhanced audit trails and automation have further

strengthened First-Time-Right (FTR) execution and improved turnaround time (TAT), elevating both client and user experience.

In addition to automation, regular cross-functional knowledge-sharing sessions are held to review emerging risks, learn from incidents, and keep pace with regulatory updates. These practices ensure that operations remain resilient, compliant, and future-ready, reinforcing the strength of client engagement frameworks.

Digital Adoption and Operational Efficiency

At 360 ONE, we are advancing sustainable operations through digital adoption and process innovation. In FY 2024-25, over 4,200 account opening forms were e-signed compared to 137 physical signings, driving paperless operations and reducing CO₂ emissions. Digital workflows also support hybrid and remote work, helping to lower commuting, energy use, and resource consumption.

Safety in Operations

In FY 2024-25, the Organisation undertook a comprehensive third-party electrical safety audit of its Corporate Office at Mumbai, as part of its ongoing commitment to workplace safety, regulatory compliance, and broader ESG goals. The audit assessed compliance with national safety standards and covered inspections of electrical installations, main and sub-distribution boards, thermography, load measurements, loop impedance, and earth pit testing. The assessment provided valuable insights into the condition and performance of electrical systems across the premises. These findings have led to a prioritised action plan aimed at mitigating operational risks and enhancing electrical safety across the premises.

360 ONE also conducts regular safety training sessions, which include modules on physical security management, basic and advanced fire safety hazards, evacuation drills, and the proper handling of fire-safety equipment. These trainings are facilitated with the support of third-party vendors.

Digital Landscape

Digital programmes are designed to improve productivity and support long-term sustainability objectives. By embedding security and resilience into design processes, the organisation ensures that new systems enhance business capability without introducing avoidable risks.

Technology Architecture

Built on a cloud-native, modular, and AI-first stack, the firm's tech architecture leverages tools such as Flutter, React, Golang, Redis, Kafka, and AWS for performance at scale. The architecture is benchmarked against leading local and global peers and incorporates large language models, agentic AI, and proprietary neural nets. The system is resilient, secure, and engineered for integration with third-party ecosystems through a firm-wide API gateway.

We are building a connected, data-driven ecosystem that empowers both clients and teams. From AI-led insights to seamless digital journeys, our innovation is designed to enhance experience, accelerate decisions and create sustainable impact.

BHUSHAN SONKUSARE
TECHNOLOGY

Launch of Advanced Analytics Platform

The deployment of an enterprise-wide analytics layer built on Snowflake has unified data from customer-facing, order management, and front-office systems into a single composable data lake. This master data management (MDM) framework delivers high data quality, consistency, and real-time insights, enabling accurate analytics, portfolio drift analysis, and risk monitoring. The next phase focuses on making this layer fully queryable through the enterprise GenAI platform, allowing predictive and generative analytics to be integrated across functions.

Launch of enterprise Generative AI platform

A firm-wide GenAI platform structured as an agent foundry has been deployed to automate, analyse, and connect enterprise data. These AI agents integrate with productivity tools (email, calendar, drive), extract insights from structured and unstructured data, transcribe and summarise client calls, and automatically publish actionable outcomes into Salesforce. The system operates through "agentic flows," enabling end-to-end automation, for example, identifying investor meetings, recording and transcribing discussions, generating summaries, and assigning follow-ups. This innovation reduces manual dependencies, accelerates decision-making, and expands analytical capability across teams.

360 ONE App

FY 2024-25 marked the rollout of the 360 ONE App, an integrated platform for HNI clients, covering products across debt, equity, and alternates. The state-of-the-art app offers clients three bespoke ways to engage with the Firm – leaving the hard work to the Firm, curate with the Firm or handpicking client portfolio. Featuring seamless onboarding, frictionless transaction journeys, and in-depth portfolio analytics the platform enhances transparency and convenience for clients. 300+ new HNI clients have been onboarded within eight months, driving four-digit crores AUM growth and a 30% quarter-on-quarter revenue rise.

RM AdvantEdge Platform

Complementing the client 360 ONE App, the RM AdvantEdge platform unifies relationship management across acquisition, advisory, and service. It provides a 360° customer view with analytics-driven cross-sell insights, ML-based proposal generation, integrated workflows through Salesforce, and omnichannel communication. This system enhances advisor efficiency and ensures clients receive consistent, data-backed recommendations across touchpoints.

~70%

Clients doing
transactions digitally

As India's largest wealth platform spanning distribution, broking, portfolio management, trust and advisory, asset management, and alternate asset management for ultra-high and high-net-worth clients, we are redefining access to exclusive investment opportunities. Through our digital-first programs, we deliver seamless onboarding, data-driven decision-making, and intelligent engagement, all while reducing our environmental impact and contributing to a more sustainable financial ecosystem.

SANTOSHI KITTUR
TECHNOLOGY

Prioritisation and Governance

We select projects based on their strategic impact, complexity, cost and resource requirements. A balanced portfolio is maintained to deliver quick wins while also supporting longer-term, transformative initiatives. Cross-functional collaboration ensures that digital priorities are driven by business needs, not solely by technology ambitions. We plan and prioritise projects based on quantitative view of maturity across layers of technology.

Impact Delivered

Digital programmes have already contributed to

- Actionable insights into opportunities and risks around customer acquisitions and attrition
- Accurate reporting and analytics and better decision support and portfolio drift analysis
- ML led product recommendation campaigns with better conversion ratios
- Sharper, relevant and timely recommendations
- Stronger risk monitoring through unified data
- Improved efficiency in client servicing and engagement through richer insights

Information Technology Policy

360 ONE's Information Technology (IT) Policy establishes a structured framework to govern, secure and optimise technology infrastructure and operations across the Organisation. It outlines guiding principles for IT planning, governance, risk management, and service delivery, ensuring that technology functions align with business strategy while maintaining confidentiality, integrity and availability of information assets. The policy defines clear responsibilities for the IT Strategy Committee, Chief Technology Officer and Chief Information Security Officer, enabling effective oversight of system security, disaster recovery, and business continuity. It also covers project management, vendor engagement, change control, and outsourcing protocols to ensure operational resilience and regulatory compliance. Periodic reviews, internal audits and employee awareness programmes strengthen adherence to best practices in IT governance and cybersecurity.

Cybersecurity

Cybersecurity is integral to how we protect our clients and our business. We combine advanced technology with constant vigilance to safeguard data integrity, ensure regulatory compliance, and build digital trust. Our commitment to resilience enables innovation to thrive in a secure environment.

ARUNAVA ROY
INFORMATION AND CYBER SECURITY

Cybersecurity is an integral component of our governance and risk management framework. Oversight is embedded at both the Board and Executive levels, supported by a dedicated team of accredited experts who continuously monitor threats, conduct penetration tests and address vulnerabilities. This approach ensures compliance with evolving regulations and reassures stakeholders of our readiness to manage complex cyber risks.

360 ONE Asset Management Ltd. and 360 ONE Alternates Asset Management Ltd. have successfully achieved the prestigious ISO 27001:2022 Certification in August 2025 - ISO being a globally recognised standard for Information Security Management Systems (ISMS). This certification reflects 360 ONE's unwavering commitment to maintain the highest standards of Confidentiality, Integrity, and Availability of information - ensuring that our clients, partners, and stakeholders can continue to place their utmost trust in us. This certification aligns with the regulatory guidelines - reaffirming our leadership in information security, governance, and cyber resilience across financial operations and ensuring that our processes, infrastructure, and governance practices meet the highest standards of Data Protection, Operational Integrity, and Incident/Risk Management within the Indian financial ecosystem.

Policies and awareness

Our Cybersecurity Policy establishes clear expectations across the organisation and provides a common framework. This is supported by mandatory training during onboarding and reinforced through regular workshops, bulletins and portal-based updates. By fostering awareness at all levels, we prepare our employees as our first line of defence against threats.

360 ONE Asset Management Ltd. and 360 ONE Alternates Asset Management Ltd. have successfully achieved the prestigious ISO 27001:2022 Certification in August 2025

Multilayer Security Architecture

360 ONE recognises potential risks stemming from complex digital threats and places a paramount emphasis on cybersecurity. In order to address the risks associated with people, processes and technology, 360 ONE has adopted a multi-layered approach to cybersecurity.

This includes implementation of various security controls such as:

- Network Security
- Application security
- DLP controls
- Cyber Threat Intelligence
- Logging and monitoring
- End Point protection
- User awareness
- Third party security review
- Comprehensive business continuity disaster recovery plans.

These measures enable the Organisation to effectively respond to and recover from disruptive incidents.

Risk Identification and Response

We take a comprehensive approach to monitoring risk across our internal systems, third-party vendors and external intelligence sources. Incidents are assessed based on their likelihood and potential impact, enabling us to allocate resources where they are needed most. Our structured Incident Response Plan provides clear guidance (from detection to containment and recovery) supported by real-time monitoring tools, periodic simulation exercises and post-incident reviews.

Balancing Security and Efficiency

Recognising the importance of balancing resilience with usability, we adopt a security-by-design approach—embedding protective measures into systems from the outset to minimise operational disruption. Employees are trained to follow secure practices without compromising efficiency.

Third-Party Oversight

Vendors and partners are evaluated through a structured risk management programme that includes due diligence at onboarding, contractual obligations, periodic audits and continuous monitoring. This reduces the risk of vulnerabilities being introduced by third parties into the broader ecosystem.

Measuring Effectiveness

Progress is evaluated through clear performance indicators, such as

- Incident response time and mean time to recover (MTTR)
- Results of vulnerability scans and penetration tests
- Employee awareness scores from training and phishing simulations
- Compliance audits against ISO 27001 and NIST standards
- Vendor risk ratings and remediation timelines

Information and Cyber Security Policy

360 ONE's Information and Cyber Security (ICS) Policy establishes a comprehensive framework to safeguard the confidentiality, integrity, and availability of information assets across all its operations. The policy outlines structured controls on data security, access management, network protection, password protocols, and incident management, in line with regulatory and industry standards such as ISO 27001. It defines clear roles and responsibilities for governance through the Chief Information Security Officer (CISO) and Information Security Committee (ISC), ensuring robust oversight. The policy also covers cyber preparedness, cloud and third-party security, and remote access protocols. Regular awareness programmes and training ensure that employees understand their responsibilities in maintaining a secure digital environment. Non-compliance results in disciplinary action under defined procedures.

Responsible Investing

At 360 ONE, responsible investing is a core discipline that guides how we allocate capital, engage with companies, and create long-term value. By embedding environmental, social and governance (ESG) considerations into every investment decision, we aim to deliver portfolios that are financially resilient and aligned with the broader interests of society and the environment.

Public Equities

Private Equity & Alternatives

Private Credit

Real Assets

Public Equities

In Asset Management, public equities form the backbone of long-term wealth creation, offering investors access to strong, quality, and dynamic businesses across the economy. ESG principles serve as a key parameter in identifying these businesses, as they not only support responsible growth but also enhance long-term wealth creation.

Responsible investing is at the core of 360 ONE AMC's fiduciary duty and its long-term value creation objectives. The firm integrates ESG considerations into its investment evaluation and stewardship practices, where applicable, by combining traditional financial analysis with third-party ESG ratings.

ANUP MAHESHWARI
PUBLIC EQUITY

Companies with robust ESG practices are better at managing regulatory, reputational, and operational risks, tend to deliver steadier profitability, and benefit from resilient cash flows. Global capital flows are increasingly aligned with sustainability, driving higher liquidity and valuations for ESG leaders. Importantly, ESG is no longer a moral consideration alone—it is recognised as a sound financial strategy, with global studies showing ESG-integrated portfolios often matching or outperforming conventional ones over time.

In India, ESG investing remains at a formative stage relative to global markets. Regulatory initiatives such as SEBI's Business Responsibility and Sustainability Reporting (BRSR) are improving disclosures and enabling more rigorous evaluations. We integrate ESG principles across all equity strategies, ensuring every portfolio benefits from governance checks, environmental risk assessments, and social impact considerations.

Our Approach in Practice

At 360 ONE AMC, we integrate ESG across both international and domestic strategies. Global mandates include customised exclusion lists aligned with investor preferences, actively reviewed at regular intervals. Domestically, we partner with a leading governance research firm to access independent insights and embed ESG scoring into our investment checklist. These measures, though incremental in appearance, reflect our structured approach to embedding ESG—balancing commercial objectives with broader social and fiduciary responsibilities.

Our ESG Framework: Structured Yet Pragmatic

Our approach goes beyond exclusionary filters; we actively seek businesses that are forward-looking, responsible, and resilient in the face of ESG challenges.

Where client mandates require, we further customise ESG integration, whether by maintaining portfolio-level ESG scores above benchmarks or aligning with specific sustainability priorities. This balances our philosophy with client needs.

Stewardship Policy and Engagement

At 360 ONE AMC, we embed stewardship into our governance framework by leveraging proxy advisory insights from leading proxy advisory firms. These advisory firms provide research, voting recommendations, and governance analysis, enabling us to:

Our full Stewardship Policy is available on our website at <https://archive.iiflmf.com/sites/mf/files/2025-07/Stewardship%20Code%20-%20July%202025.pdf>

Private Equity & Venture Capital

As one of India's largest alternative asset managers, we operate a comprehensive private markets platform spanning venture capital, growth equity, and pre-IPO investments.

At 360 ONE Asset, we view private equity as more than an investment strategy; it is a catalyst for entrepreneurship, innovation, and inclusive growth. Our commitment to responsible capital ensures that every partnership we form not only delivers financial returns but also advances sustainable business practices and long-term value creation.

SAMEER NATH
PRIVATE EQUITY

Over the last decade, we have backed several market-leading companies across technology, financial services, healthcare, and consumer industries, enabling both economic growth and positive social outcomes.

Private equity represents a dynamic investment avenue through the acquisition of equity stakes in privately held companies. At 360 ONE, we view it as a catalyst for entrepreneurship and innovation while creating sustainable economic development. Our platform is one of the few in India that spans the entire spectrum from Idea to IPO, providing us with a differentiated ability to support companies across all growth stages.

Private equity has recognised the growing importance of integrating ESG practices into its investment strategies. ESG considerations involve assessing the environmental impact, social responsibility and corporate governance practices of target companies. By incorporating

ESG factors into their decision making, private equity firms aim to create enduring value that benefits both investors and society as a whole. This approach acknowledges the growing understanding that responsible investing can lead to positive transformations, mitigate risks and improve the overall performance and resilience of portfolio companies.

360 ONE Asset is committed to responsible investing, as outlined below. Governance holds significant importance in all our venture capital and private equity deals. Prior to funding any deal, we conduct comprehensive integrity, accounting, tax and financial due diligence. Our strong focus on governance ensures transparency and accountability throughout the investment process. Moreover, we conduct legal due diligence to identify any potential risks and liabilities associated with the investment. We use reputed third-party consultants to assist us with due diligence work streams. Their

scope of work includes various environmental and social aspects such as evaluating adherence to environmental laws, labour and employment practices, POSH (Prevention of Sexual Harassment), maternity benefits and other relevant regulations. Our rigorous due diligence process helps us make informed decisions and mitigate any potential risks that may arise in the future.

Our portfolio includes pre-IPO companies and listed companies that already adhere to certain ESG mandates.

ESG integration is a holistic approach to investment analysis where traditional fundamental analysis is combined with material ESG factors to take an informed investment decision. It does not preclude investment in a company, sector or country because of any specific activity and instead aims to obtain a more comprehensive position. We believe that the consideration of material ESG factors in conjunction with traditional fundamental analysis allows for a more holistic assessment of investment opportunities, which leads to balanced and sustainable investment outcomes.

Our Strategies and Focus Sectors

Our private equity platform operates across four complementary strategies, enabling us to capture opportunities across the lifecycle of businesses:

Unique Platform in India’s Private Market Spanning the Full Spectrum (Idea to IPO) across five focussed sectors as shown below.

Our portfolio spans industries where growth potential intersects with positive ESG outcomes:

Pre-investment

ESG plays a crucial role in our evaluation stage for potential investment opportunities. It serves as a risk assessment tool enabling a cautious approach in deploying our investors’ money in the appropriate assets. The team undertakes detailed qualitative and quantitative analysis of the potential investment opportunity. Our Investment Committee is apprised of material ESG findings where applicable.

Post-investment

Engagement with companies on a periodic basis helps us monitor the ESG-related factors of our portfolio companies. The underpinning of our engagement with companies is our belief that companies that are well governed, make transparent disclosures and manage stakeholder relationships are best suited to deliver sustainable shareholder value. By engaging proactively with companies, we aim to encourage them to adopt more sustainable practices and improve their governance, which in turn can lead to long-term benefits for both the company and its investors. Closer engagement with the relevant

stakeholders ensures that we build resilience to emerging ESG issues by being able to identify early warning signals. This allows us to proactively address potential risks and capitalize on opportunities related to ESG factors. The engagement process is undertaken by our investment team with support from the fund managers. It involves a dialogue on material ESG factors, with the focus on better understanding the position of the company on such material ESG factors, and to help the company understand our concerns on the same.

In conclusion, ESG integration at the 360 ONE PE & VC arm is embedded across the investment lifecycle and is fundamental to how we assess risk, create value, and support the long-term sustainability of our portfolio companies.

We recognise that the ability to influence ESG outcomes varies by investment structure, stage, and sector. Accordingly, we adopt a pragmatic and proportionate approach, leveraging our role as long-term capital providers and strategic partners to encourage continuous improvement in corporate governance and social practices, thereby positioning our portfolio companies for sustainable growth.

Private Credit

Our Private Credit business plays a pivotal role in advancing sustainable financial solutions across India's rapidly evolving economy.

Through disciplined investing and ESG-aligned decision-making, we're channelling capital into opportunities that deliver financial returns while creating long-term social and environmental impact.

AAKASH DESAI
PRIVATE CREDIT

Investment Philosophy

We focus on performing credit, an asset class gaining momentum in India. Our private credit strategy leverages AIFs and PMS vehicles to pool and deploy capital into bespoke, secured fixed-income transactions. We follow a disciplined, sector-agnostic approach focused on corporates with strong operating and financial histories. Our 'no-go' framework excludes distressed assets, unsecured lending, long-term infra and venture deals, ensuring capital flows only to socially responsible and resilient businesses.

ESG Integration

Detailed financial analysis, legal reviews, and commercial diligence assess creditworthiness. As part of diligence, we capture significant environmental and social risks, such as relocation of communities, environmental approvals in the Investment Note, which is presented to the Investment Committee.

We endeavour to embed ESG across the entire investment lifecycle:

- **Pre-investment:** ESG parameters during diligence.

- **Decision stage:** Risks and mitigants considered.
- **Post-investment:** ESG monitoring and encouraging portfolio companies to adopt sustainable practices.

Impact in Action

- Supported one of India's largest microfinance institutions to extend financial services to rural communities.
- Partnered with a leading renewable energy company to develop a green hydrogen plus ammonia plant.
- Collaborated with a major hospital chain to expand access to quality healthcare.

Scale and Expertise

- With AUM exceeding ₹12,000 Crores and over 64 unique investments, we are one of India's leading private credit platforms. Our team brings over 90 years of collective credit experience and is backed by a strong compliance and risk framework.

Real Assets

Infrastructure and real estate continue to be important contributors to India's economic progress. At 360 ONE, we facilitate investments in select partnerships and customised opportunities across these sectors.

As investors, we believe long-term value grows when environmental and social factors are embedded in our decisions. Investing in sustainable projects reflects both sound business judgment and our commitment to responsible, innovative growth.

NIRAJ MURARKA
REAL ASSETS

Our approach is guided by a framework that emphasises disciplined evaluation, risk awareness, and long-term value creation while taking into account environmental and social aspects relevant to each project.

Our E&S approach is focused on identifying and managing environmental and social factors within our investment activities. It reflects our belief that awareness of such considerations can support long-term value creation and prudent risk management.

Guiding Philosophy

Our investment philosophy emphasises pragmatic E&S integration—seeking to identify, assess, and manage material issues that could affect long-term performance.

Environmental Considerations

We acknowledge the importance of minimising adverse environmental impacts and promoting responsible use of natural resources. In particular, our investments seek to:

- Support real estate projects designed as green or sustainable buildings, incorporating efficient energy use, water conservation, and reduced carbon footprint;

- Encourage adherence to recognised environmental certifications or standards where feasible;
- Promote renewable and green energy projects, including solar, wind, and hybrid systems that contribute to cleaner energy generation.

Social Considerations

We recognise that social factors — including labour practices, health and safety, diversity, community impact, and human rights — can affect long-term performance.

We review investee companies' practices, stakeholder relationships, encourage workplace safety and fair treatment and potential community or reputational sensitivities.

Integration into Investment Process

We endeavour to incorporate E&S factors into investment due diligence and ongoing monitoring as part of broader risk management. We consider internal judgment, publicly available data, or third-party inputs to evaluate material issues.

Continuous Improvement

We acknowledge that E&S understanding continues to evolve. We aim to remain informed of emerging trends and good practices while maintaining flexibility to refine our approach.

Marketing & Ethical Communications

Philosophy and Scope

Marketing at 360 ONE is founded on trust. For us, every communication is more than a message; it reflects our client-first approach across wealth management, asset management, lending, broking, and digital platforms.

Marketing, for us, is the bridge between purpose and performance. We position 360 ONE on the pillars of trust, transparency and long-term value creation, thereby demonstrating how responsible wealth management can enable both impact and prosperity for the families we serve.

RONAK SHETH
MARKETING

Organisational Approach and Strategy

Our ethical marketing is embedded in our brand philosophy and long-term strategy of Performance Plus: personal, persistent, and principled performance. Trust and transparency are the cornerstones of our client-first approach, ensuring that every communication reflects fairness, integrity, and clarity.

Our Brand Guidelines and Media & Communication Policy read with extant laws and regulations establish principles for producing and using marketing content across geographies and businesses. They ensure all communications are clear, fair, balanced, and not misleading, while providing processes, controls, and supportive tools. This framework helps us reinforce consistency, maintain transparency, and avoid practices that could create conflicts of interest.

Through responsible marketing campaigns, events, advertising, publications, and digital-first solutions, we strengthen trust-based advisor-client relationships.

In sensitive contexts, such as acquisitions or market volatility, leadership mandates direct client engagement (calls, meetings, FAQs) to provide clarity rather than promotional campaigns.

63
NPS

Marketing Policy Development and Implementation

Policies are embedded across teams through structured training and compliance briefings that create awareness and alignment. For marketing staff, standard operating procedures and brand guidelines ensure consistency in communication and adherence to ethical marketing. Client communication and client pitch decks used by Sales teams are created by Marketing using the same guidelines. To strengthen accountability, feedback loops, grievance redressal forums, and an independent ethics helpline on our brand website, provide channels for escalation and resolution.

Monitoring and Feedback

Accountability is maintained through structured monitoring. All campaigns are logged through compliance dashboards and audit trails, while grievance redressal forums and a third-party ethics helpline allow both clients and employees to raise concerns. Complaints are resolved through a structured escalation matrix and none were left unresolved in FY 2024-25.

We treat feedback as a tool for learning. Grievances are reviewed quarterly to identify systemic improvements, which are then translated into updates to policies, training content or operating processes. Regular audits and reviews of our Brand Guidelines and Media & Communication Policy ensure that they remain responsive to new regulations (such as SEBI’s disclosure requirements for mutual funds and alternatives), as well as shifting societal expectations around responsible communication.

Oversight structure

Board / CSR & ESG Committee	→	Strategic alignment with responsible business conduct.
Compliance & Risk teams	→	Pre-publication review for accuracy, fairness and regulatory adherence.
Product Approval Committee	→	Suitability checks for product offerings.
Product Approval Committee	→	Suitability checks for product offerings.
Marketing teams	→	Ownership of content, creative design and execution.

Zero

Incidents of non-compliance concerning product and service information and labelling

Zero

Responsible Selling

Client-Centric Approach

At 360 ONE, responsible selling is embedded into the client engagement framework through practices that prioritise suitability, transparency, and fairness. Every investment recommendation begins with a detailed client risk profiling exercise, assessing risk tolerance, investment objectives, and financial situation.

For investment products, a high-level Product Approval Committee (PAC) screens offerings before distribution, while Compliance and Risk Management teams review all marketing materials and term sheets to ensure transparent disclosure of risks. This process ensures that investment solutions are aligned with client needs and interests, rather than short-term sales outcomes.

Monitoring, Escalation, and Confidentiality

360 ONE monitors responsible selling practices through compliance reviews, grievance redressal forums, and feedback loops. A structured Grievance Redressal Policy sets clear turnaround times (initial response within two days) and quarterly review forums to identify systemic issues. For internal concerns, the Vigil Mechanism and Whistleblower Policy ensure independence and fairness in investigations. An independent third-party Ethics Helpline (via toll-free, email, chatbot, QR code, or postbox) allows for confidential and anonymous reporting. Non-retaliation safeguards guarantee protection for whistleblowers.

Customer Rights and Transparency

Clients are provided with clear, accurate, and comprehensive disclosures regarding products and services. Compliance and Risk teams review all client-facing materials to ensure full transparency on pricing, risks, terms, and responsibilities. Service continuity and changes are communicated promptly through email, calls, and digital platforms in clear, understandable language. In FY 2024-25, these measures contributed to 89% client satisfaction levels.

89%

Client satisfaction levels.

Investment Policy Statement (IPS) for Portfolio Management Services (PMS) clients

For select PMS relationships, we formalise client mandates through an Investment Policy Statement (IPS). The IPS documents objectives, permitted instruments, risk limits, liquidity needs and do's and don'ts, providing a contract-like guide for portfolio management and periodic reviews.

Key IPS elements

- Client objectives and time horizon.
- Risk tolerance and permitted concentrations.

- Benchmarks and performance measurement parameters.
- Liquidity constraints and cost considerations.
- Review cadence and amendment procedures.

Education and Engagement

Responsible selling extends to client education. Workshops, seminars, research reports, webinars, and initiatives such as the Young Leaders Program and Founders' Day help clients make informed decisions. Regular surveys, gratitude calls, and structured feedback mechanisms guide continuous improvements in service quality and responsible selling practices.

Education and engagement initiatives

- Research reports and thematic note series.
- Webinars and seminars for wealth and advisory clients.
- Young Leaders Program and Founders' Day (peer learning and networking).
- Regular gratitude calls and proactive outreach for high-priority clients.

Customer satisfaction processes

- Structured surveys covering service experience, process efficiency and user experience.
- Gratitude/outreach calls to gather qualitative feedback.
- Survey results inform training and process improvements through quarterly forums.

Outcomes and Continuous Improvement

In FY 2024-25, 360 ONE resolved 53 client complaints with zero pending at year-end. No unresolved cases were reported in restrictive trade practices, data privacy, or advertising. Quarterly grievance review forums help translate lessons learned into policy refinements, service enhancements, and training inputs.

AAC-PAC Interaction Framework

The Asset Allocation Committee (AAC) and the Product Approval Committee (PAC) work closely to translate strategy into client portfolios. The AAC sets strategic allocation views and rebalances the portfolio framework based on client objectives and market conditions. The PAC performs granular product due diligence and curates the list of approved instruments that feed into portfolio construction.

Pillars of our strength, stability and sustainability

Our performance represents our commitment, supported by the dedication of our workforce. The trust we have earned over the years, the milestones we have achieved and the foundation we are building for the future are all underpinned by the diligence and perseverance of our employees. Therefore, the well-being of our people is central to everything we do. Our results-driven culture is rooted in integrity, collaboration and care, supported by inclusivity and accountability. With robust governance, an equal opportunity culture and a secure environment, we take pride in being recognised as a Great Place to Work® and Best Workplaces™ in Investments – India 2025.

Our People Philosophy

360 ONE embodies inclusivity, accountability and holistic well-being, synergising performance and purpose to drive sustainable value creation. We are dedicated to cultivating a culture that inspires our employees to realise their highest potential while supporting both personal and professional growth.

People are our greatest strength. We're committed to nurturing an inclusive, learning-driven culture that empowers individuals to grow and contribute meaningfully to our collective success.

NAVIN UPADHYAYA
HUMAN RESOURCES

Permanent Employees

Diversity, Equity and Inclusion (DEI)

360 ONE has a policy for Equal Opportunity and Commitment to Diversity in place. It is committed to create and maintain a workplace in which all employees have an opportunity to participate and contribute to the success of the business and are valued for their skills, experience and unique perspectives. The policy also ensures equal opportunity to all its employees irrespective of race, colour, ancestry, national origin, gender identity, sexual orientation, marital status, religion, age, disability. The policy expressly prohibits any form of unlawful employee harassment or discrimination at the workplace. The gender

diversity in the Organisation as on March 31, 2025, stood at 30% and 360 ONE constantly endeavours to improve the same.

Various initiatives have been implemented in the workplace for easy access for differently-abled individuals. The office areas have been well facilitated with easy access to lifts and ramps for easy movement across the floors of the corporate office, with availability of wheelchair.

Our Equal Opportunity and Commitment to Diversity Policy is available on our website at https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_Equal_Opportunity_and_Commitment_to_Diversity_Policy_bf5240b340.pdf

Learning and Development

We believe that future-readiness requires systematic and thoughtful investment in skill-building, leadership development and digital fluency. Through structured programmes, digital tools and partnerships with external institutions, we enable employees to grow in their current roles while preparing them for emerging opportunities.

Talent Management and Development

Our commitment to attracting, developing and retaining top talent reflects a strategic investment in building professionals who drive the organisation to reach new heights of success. Our approach integrates lateral hiring of senior private bankers and structured trainee programmes, creating a multi-tiered pool of expertise.

92%

Retention rate

Internal Jobs

All internal job postings use gender-neutral language and are openly advertised, ensuring equal opportunities to employees seeking internal movements as well as for external applicants.

Employee Wellbeing and Safety

At 360 ONE, we take a holistic approach, encompassing financial security, healthcare, work-life balance and mental health support. Safety is equally prioritised, with policies and practices designed to prevent incidents and ensure compliance.

The Organisation has a robust system of policies and processes to always ensure the wellbeing of its employees. It ensures that there are first-aid kits that are placed on each floor and are replenished on a regular basis. 360 ONE has tie-ups with clinics in the vicinity of its corporate office, to ensure there is a doctor on call and immediate medical assistance as required. Within the premise there is availability of hospital beds, stretcher, wheelchairs and also a hospital setup for any medical emergency support. A dedicated ambulance is also available at the Corporate Office, Mumbai.

Key Employee Initiatives

Parental leave

360 ONE recognises and prioritises the significance of parental leave in promoting the well-being of the employees and their families. The Organisation has implemented a parental leave policy that facilitates a smooth transition into parenthood for the employees. This policy allows the employees to adjust to their new responsibilities.

Health and Life insurance

All employees are covered by health and life insurance, with coverage extending to dependents with an option to top-up for higher cover. All employees also get a group life cover as part of our comprehensive benefits suite.

In-house medical access

Employees and their immediate family can access free consultations with our in-house practitioner, via teleconsultation (online or in-person). All consultations are free and completely confidential, ensuring that no personal health information is shared with the organisation.

Mental-health and wellbeing platforms

We offer 24x7 mental-wellness support via YourDOST (access to certified experts, self-help tools and group sessions).

On-site/weekly wellbeing

Guided yoga sessions are held weekly to support physical and mental balance.

Wellness initiatives and events

Sound healing workshops and other curated wellbeing sessions are part of our calendar.

Fair Remuneration

360 ONE recognises the importance of fair and competitive remuneration for all their employees. It believes in offering a comprehensive compensation package that aligns with industry standards and reflects the skills, experience and

contributions of its workforce. The remuneration framework takes into account factors such as job responsibilities, performance and market trends to ensure that the employees are fairly rewarded for their efforts and are motivated from incentives perspectives.

The remuneration for other employees is as per compensation structures and policies as may be determined and reviewed from time to time, with an objective of attracting, retaining and motivating them with appropriate balance of fixed and performance linked pay.

Performance Appraisal Process

360 ONE follows a meritocratic performance appraisal process. Year on year, through its structured performance management system, high performers are identified and incentivised through career progression.

Goal-setting

The performance appraisal process starts with a goal-setting exercise wherein employees collaborate with their immediate reporting authority to align their objectives with the Organisation's vision and objectives.

Self-assessment

Employees fill an online appraisal form which describes their achievements across the various key result areas and also rate themselves against each such key result area. This exercise ensures clarity and alignment in performance expectations.

Managerial Review

This information is then forwarded to their immediate reporting authority and department heads for giving their feedback on the employee's performance and an overall rating is arrived at which is used as a basis for deciding the compensation pay-outs.

100%

of the eligible employees underwent performance and career development reviews during the FY 2024-25.

Career Development and Recognition

High performers are identified through the appraisal cycle are rewarded through career advancement opportunities, internal mobility and recognition programmes. This approach reinforces a performance-driven culture while offering employees clear pathways for growth and development.

Recognition and Culture

Culture forms the bedrock of our operations at 360 ONE. We aspire to build a workplace where employees feel respected, recognised and empowered to contribute meaningfully. Recognition reinforces performance, while a culture of inclusion and safety ensures that our people thrive both personally and professionally.

Retirement benefits

360 ONE provides transition assistance programme to facilitate continued employability and the management of career endings. Post retirement, employees are evaluated and an option to work as full-time or part-time consultants, may be provided on a case-to-case basis. Retirement bonus is made available to the employees that is one month's gross salary for every completed year of service to the employees that have been with the Organisation for a minimum of 5 years. The Organisation also contributes to the Employees Provident Fund and further provides a platform for employees to create their own corpus by investing in the National Pension Scheme via the Organisation.

Safe and Inclusive Workplace

We have a safe, secure and harassment-free workplace. Respect for human rights is foundational to our people philosophy. Our policies safeguard employees against violence, discrimination and unfair treatment.

- A dedicated Internal Complaints Committee (ICC) has been constituted in line with the POSH Act. Employees can raise complaints through a dedicated email ID (posh@360.one) or via the HR Helpdesk on the internal portal.
- Additional reporting mechanisms exist on the HR portal to report discrimination or harassment-related concerns, which are directed to the Human Resources team.
- Complete protection is assured to complainants against retaliation, intimidation, demotion or any adverse action for raising concerns in good faith.

In FY 2024-25, there was no complaint received regarding sexual harassment, working conditions, health and safety, discrimination at the workplace, human rights violations, child labour, forced/involuntary labour, wages and employee safety issues.

Approach to Human Rights and Employment Practices

Our policies are aligned with both regulatory requirements and business needs. They reflect our commitment to respecting human rights, preventing adverse impacts and implementing

corrective actions when needed. By integrating best employment practices into the policy framework, we strive to create an equitable, transparent and ethical workplace.

Training on Human Rights issues and policies	FY 2024-25
Male	841
Female	366

During FY 2024–25, 100% of our plants and offices were assessed by independent third parties for compliance with workplace ethics and human rights standards.

Employee Feedback and Communication

We prioritise open, transparent and two-way communication across all levels of the organisation. Our Open-Door Policy encourages employees to approach leaders freely with questions, ideas or concerns. During induction, new joiners participate in a gamified leadership connect activity. This enables them to engage

directly with senior leaders to understand our history, milestones and strategic vision. Regular townhalls, quarterly earnings calls and leadership sessions keep the workforce informed about business performance, objectives and achievements. Functional heads lead periodic team huddles, while managers conduct one-on-one meetings for goal-setting, progress reviews and career discussions, all tracked through our HR Portal. Communication also thrives digitally through our employee helpdesk, MS Teams channels and Business WhatsApp communities, including special interest groups on AI, investments and wellness. These channels nurture collaboration, transparency and a strong sense of shared ownership.

The organisation utilises a diverse mix of structured and informal forums to achieve open communication. These include:

Employee Volunteering Surveys

Conducted periodically to gather insights into engagement levels and areas of improvement.

Inductions and Training Programmes

Designed to build capability and gather feedback from new joiners on their integration experience.

Annual Offsites

These provide opportunities for team-building, open discussions and alignment with organisational goals.

MoodXpress HR Portal

A digital tool available on the intranet that captures real-time feedback and employee sentiment.

Employee Grievance Redressal

360 ONE is committed to creating an environment where all its stakeholders, including contractors, suppliers, service providers, contract personnel and directors, feel secure raising concerns about any unethical or improper behaviour.

To ensure this, 360 ONE has a Policy on Vigil Mechanism and Whistle Blower Mechanism which enables stakeholders to report any

incident that indicates malpractice, major irregularities, fraud, unethical business conduct, abuse or wrongdoing, or a breach of any Indian legislation. When an employee or a director reports in good faith, the existence of any of the aforementioned activities, they are protected under the Policy from being fired, subjected to retribution, or discrimination.

360 ONE has a third-party ethics helpline which creates an open atmosphere that encourages employees to red flag internal ethics and compliance issues without any fear of retaliation. With these timely alerts, raised internally, the senior management can deal with incidents internally and protect employees, business interests and reputation.

The Organisation also has an employee grievance portal which is available on the intranet and is accessible to all employees to voice their day-to-day concerns and get them addressed in a timely manner.

The Organisation also offers an external independent multi-channel interface to its employees, for reporting any unethical conduct / malpractice they may see around them. Employees have access to toll free number, access to online reporting and mailing options. The Audit Committee and Vigilance Committee conduct a detailed investigation on any concerns reported. The said policy is available on https://s3.ap-south-1.amazonaws.com/x-web-s3.360.one/360_ONE_Policy_on_vigil_mechanism_and_whistle_blower_mechanism_2dd3b3dff3.pdf

Further, a separate provision has been made on the internal HR Portal, where concerns related to discrimination or harassment can be reported and get directed to the concerned set of individuals in the Human Resources Team.

Complete protection is given to the complainant / whistle blower against any unfair practice like retaliation, threat, or intimidation of termination / suspension of service, disciplinary action, transfer, demotion, refusal of promotion, discrimination, any type of harassment, biased behaviour including any direct or indirect use of authority to obstruct the complainant's right to continue to perform his / her duties / functions.

Corporate Social Responsibility (CSR)

360 ONE Foundation ('Foundation') reinforces the group's commitment to maximise both financial and social returns. As leaders in the wealth and asset management sector, we leverage our core competencies and expertise beyond providing mere funds as part of our responsibility to society.

We believe that building resilient livelihoods is fundamental to India's long-term economic growth and social equity.

To this purpose, the Foundation has re-imagined traditional grant-giving and has pioneered a more catalytic approach powered by blended finance and outcome-based financing. By unlocking further capital, recycling funds, co-funding, and a strong focus on achieving measured outcomes, our innovative approach generates higher leverage on its grants, thereby delivering exponential impact for underserved communities.

Our Focus Areas

Our Foundation's interventions focusing on employability and entrepreneurship are designed to improve livelihoods using financial access and inclusion as one of the key levers.

We strive to build necessary bridges between informal and formal sectors, guiding vulnerable communities towards formal credit sources. We believe in holistic, long-term solutions which not only develop skills and capacities, digital and financial literacy, and enable market and government linkages, but also overlay financial access and inclusion to mainstream individuals and small businesses into the formal economy.

At 360 ONE Foundation, we believe that financial access and inclusion can become the foundation of a resilient future for underserved communities. It enables individuals and nano-businesses to move from survival to sustainable growth. We use tools like returnable grants and credit guarantees to unlock working capital, create digital credit footprints, boost incomes and build pathways to formal finance for marginalised groups.

More capital beyond our initial grant

Our Approach

We view CSR as a unique pool of patient capital that is risk tolerant and seeks no return. We recognize the potential for grants to provide concessionality, and deploy grants to unlock commercial capital, reach more, achieve more with less.

We vet and co-curate interventions that use outcome-based funding (OBF) and blended finance (BF). While blended finance strives to increase the quantum of funds available to non-profits, outcome-based funding ensures that these funds translate into maximum outcomes.

Key CSR Initiatives FY 2024-25

Doubling Incomes and Establishing Creditworthiness of Rural Women Entrepreneurs (RWEs)

This project uses a catalytic approach to increase incomes of new-to-credit marginalised RWEs and build their creditworthiness. Besides capacity building, handholding and market linkage support, RWEs are provided working capital of ₹15,000 via returnable grants (RGs) (zero-interest, zero-collateral loans with only a moral obligation to repay). This working capital is used by RWEs to stock a wider variety of goods and buy in bulk, enabling them to bring in more customers, increase daily sales and boost profits.

The funds returned by this first cohort of the non-profit will be reinvested into new cohorts of women-owned businesses. A portion of the returned funds will be used to create a first loss default guarantee, unlocking formal credit to at least 40% RWEs, allowing them to further scale and sustain their businesses.

BENEFICIARY IMPACT CHRONICLE

Monika Yogi, a young mother and graduate from Santhali village in Tonk, Rajasthan, is rewriting the story of rural women entrepreneurship. With limited means but big aspirations, she decided to take charge of her family's small kirana store and turn it into a thriving local business.

Her journey took a significant leap when she received a ₹15,000 Returnable Grant through Frontier Markets' Meri Saheli platform. In just four months, Monika increased her monthly business turnover from a modest ₹1,400 to an impressive ₹13,000. Her monthly income also saw a sharp rise—from ₹150 to ₹1,600. With a 3X wallet rotation multiplier, she began managing her inventory more efficiently, ensuring quick stock turnover and better product availability for her customers.

But this transformation wasn't just about the numbers. Equipped with digital tools, market insights, and growing confidence, Monika is emerging as a role model in her community. She's not only expanding her business, but also managing motherhood and entrepreneurship with resilience and determination.

Monika's story shows the power of timely, impact-first support. With even a small financial boost and the right ecosystem, rural women entrepreneurs like her can unlock extraordinary growth—for themselves, their families, and their communities.

MONIKA YOGI,
Kirana store owner

Enabling the Growth and Scale of Impact-first Agriculture and Allied Sector Social Enterprises

The initiative with Villgro Innovations Foundation supports 11 market-ready social enterprises to scale their impact in climate-resilient agriculture, rural livelihoods, and environmental innovations. Many of these social enterprises work with marginalised farmers across India by expanding access to income- and livelihood-enhancing, climate-resilient solutions.

In addition to what other CSRs fund, i.e., technical assistance, mentorship, access to market support, in our unique model, a portion of our grants act as first loss default guarantee (FLDG) and enable credit access to affordable, collateral-free loans for the startups through financial institutions like NABKISAN and others.

Projected Cycles of Loans

Includes Diagnostic Panels to evaluate capabilities of enterprises; Technical Assistance to help them in specific areas where they lack expertise; Mentoring on brand-building, networking and negotiating

Capacity Building

Provision of Working Capital to Grow Three Marginalised FPCs

The project with Vrutti empowers three marginalised FPCs to increase farmer incomes, as well as improve FPC turnover, profitability, value addition, and number of shareholders. In addition to provision of technical assistance, the grant by 360 ONE Foundation also acts as patient no-cost working capital through a revolving grant (RG) facility.

The revolving grant will build a pathway for formal financing for these FPCs. As the programme progresses and the FPCs' books and value chains are strengthened, a portion of the RG returned to the FPCs will be used as a FLDG, enabling them to unlock formal credit at favourable rates. This reduces the FPCs' dependency on grants in a staggered manner and ensures a sustainable transition towards accessing formal financing and markets, ultimately leading to better incomes and more stable livelihoods for the farmers involved.

BENEFICIARY IMPACT CHRONICLE

Venkateshwaramma, a housewife from Yembai village in Bugganipalle, Andhra Pradesh, has taken up farming to create an independent and sustainable income. She applied for a sheep-rearing program, receiving a revolving grant of ₹50,000. She procured eight young sheep. Along with her husband and three other grant recipients, she obtained permission to use nearby government land, where they collectively built two small sheds and fenced the area to safeguard their livestock.

This initiative provides Venkateshwaramma with a stable income and greater flexibility, allowing her to balance household responsibilities and manage her investment.

Recognising the unpredictability of rainfed farming, she sees livestock as a crucial alternative for financial security. In addition to the sheep, she owns two cows and aspires to build a dedicated shed to protect them from extreme heat. She is actively coordinating with the FPC team to apply for a state government subsidy for shed construction, demonstrating her growing confidence in navigating financial opportunities.

VENKATESHWARAMMA,
Sheep Owner

Improve income of marginal farmers by reducing cultivation costs & better market linkages

This blended finance project with Vrutti aims to empower smallholder groundnut farmers by integrating them into cohesive value chains. In the first year of the project, the FPCs were supported with capacity building to ensure improved output, establish quality standards and reduce cultivation costs. This year, the focus was on driving efficiencies of scale, through consolidated sourcing of inputs, value addition by processing products, increasing the number of farmers transacting through the FPCs, and establishing better market connects with prominent buyers for the farmers to reap the benefits of collectivisation on their incomes.

A unique aspect of this project is that risk investor provides upfront concessional working capital as debt (~70%) to finance operations upfront, and remaining funding needs are met through the outcome-based grant by 360 ONE Foundation. As an OBF structure, the funding is contingent upon completion of targets, including doubling farmer incomes by FY 2026-27 and promoting the sustainable growth of FPCs.

Vrutti provides technical assistance to the FPCs, which in turn enables them to be able to repay the commercial working capital, while being incentivised on quality and efficiency through the outcomes-based funding structure for the implementation duration. This strengthens the FPCs to become financially sustainable, move up the value chain, and capture market premiums—all while driving inclusive growth for farmers.

Programme Highlight: Nature-Based Livelihoods for Tribal Communities

The Challenge We're Addressing

The Kanha region is grappling with deeply interconnected challenges — land degradation, extreme poverty and high levels of distress migration. For the Gond and Baiga tribal communities, traditional guardians of the forest, declining soil fertility and water scarcity have undermined their livelihoods and eroded their cultural identity. There was an urgent need to restore ecological health while creating sustainable income opportunities.

The Path We Took

In partnership with the Earth Focus Foundation, we launched a nature-based livelihoods programme that blends ecological restoration with economic resilience. The initiative is rejuvenating over 70 acres of barren through agroforestry and horticulture practices. More than 22,000 native trees have been planted, supported by a blend of returnable grants (RGs) and government schemes, such as the State Bamboo Mission and MNREGA. This model improves soil quality, replenishes water sources and creates a self-sustaining cycle of restoration and livelihood generation.

The Change We Created

The initiative is reshaping both landscapes and lives. Native biodiversity is returning as local flora and fauna begin to thrive once again. Tribal families are now cultivating climate-resilient crops that provide stable food sources and income, reducing dependence on seasonal migration and fragile forest resources. For the Gond and Baiga communities, this initiative has restored livelihoods on ancestral lands, offering a future rooted in dignity, choice and ecological balance.

Corporate Social Responsibility Policy

360 ONE's Corporate Social Responsibility (CSR) Policy outlines our structured approach to creating measurable social impact in alignment with the provisions of the Companies Act, 2013. The Policy ensures that all CSR programmes are strategically designed, implemented, and monitored through a clear governance structure involving the Board and the CSR and ESG Committee. The CSR framework also includes mechanisms for impact assessment, fund utilisation certification, and employee volunteering, ensuring that every intervention contributes meaningfully to inclusive growth and long-term community wellbeing.

in Bengaluru and Gurugram

22+ Lakhs

units of green electricity consumed

360 ONE endeavours to adopt sustainable practices across its operations. We recognise our responsibility to reduce our environmental footprint and address climate change risk. Our focus remains on energy efficiency, renewable power adoption, prudent water use, and responsible waste management, ensuring that sustainability is embedded into everyday business operations.

Our approach is centred on reducing the environmental impact of our operations. Over the years, we have advanced several initiatives such as improving energy efficiency, expanding the consumption of green power, and adopting responsible waste practices across our offices.

We take conscious steps to reduce our environmental footprint. From renewable energy to waste management, every action reflects our commitment to the planet.

SAVIO DSOUZA
ADMINISTRATION

Energy management

Effective energy management is an important part of our sustainable practices. By focusing on green power sourcing and efficiency measures, we aim to reduce our carbon footprint and contribute to global sustainability goals. Our efforts are directed towards integrating energy-efficient technologies, optimising consumption, and steadily increasing the share of green power across our offices wherever feasible and available.

Moving Towards a Low-Carbon Office Network

Recognising that electricity consumption across our offices contributes significantly to our environmental footprint, we adopted green power since June 1, 2022. During the year under review, ~81% of our total electricity usage was sourced from green power. Notably, our Mumbai Corporate Office and Bengaluru Office are now fully powered by renewable energy, together accounting for more than 22 Lakhs units of clean power. In addition, our Bengaluru and Gurugram offices are located in LEED-certified buildings, reinforcing our commitment to low-impact operations.

Driving Efficiency Through Technology

Over the years, we have implemented a series of energy-saving upgrades across our facilities, including the installation of radiant cooling systems, occupancy sensors, energy-efficient UPS racks and the replacement of CFLs with LED lighting.

These initiatives have improved day-to-day efficiency, lowered Scope 2 carbon emissions and reduced energy costs. Our energy intensity also improved to 2.98 GJ per ₹ Crores of revenue, compared to 3.34 GJ in the previous year.

Carbon Emissions

Reducing carbon emissions is central to our environmental agenda. At 360 ONE, our focus is on expanding renewable power usage and adopting energy-efficient practices, both of which directly reduce our Scope 2 emissions. These measures help us minimise our carbon footprint and contribute to broader climate action efforts.

Progress in FY 2024-25

During the year, our Scope 1 emissions were at 0.21 tCO₂e, while Scope 2 emissions stood at 381.07 tCO₂e as compared to 326.15 tCO₂e during the previous year. The reported increase in Scope 2 emissions year on year is mainly due to:

- increase in the number of offices from 24 to 27 and
- enhanced reporting coverage of 5 offices for which bills were unavailable and emissions from these offices were calculated using the average consumption of the other 20 locations, which run on non-renewable power.

Looking Beyond Direct Emissions

While our Scope 1 and 2 emissions are actively monitored with an aim to reduce the same, currently the Organisation does not measure Scope 3 emissions. However, we are taking steps to build capabilities for future measurement and disclosure of Scope 3 emissions in possible and reasonable ways, in subsequent years.

Responsible Travel Practices

At 360 ONE, we are conscious of the environmental impact of business travel and are committed to reducing our carbon footprint through responsible travel practices. Our travel policy emphasizes advance planning and approval by business heads to ensure that travel

is purposeful and efficient. We promote the use of digital platforms for booking and expense tracking, reducing paper usage and streamlining workflows. Where feasible, employees are encouraged to opt for virtual meetings over physical travel, helping to minimise greenhouse gas emissions and support a more sustainable way of working.

Water conservation

We recognise that effective water management not only conserves a vital national resource but also reinforces our position as an environmentally responsible organisation. While our operations are not water-intensive, our offices are the primary points of consumption. Additionally, we have taken active steps to uphold a future-orientated approach.

Managing Our Water Footprint

In FY 2024-25, total water consumption across 27 domestic offices stood at 14,350 kilolitres of water, compared to 8,384 kilolitres in the previous year. This increase is attributable to the expansion of our reporting boundary, now covering all India operations. As we grow, we remain committed to ensuring that the growth in operational scale does not lead to disproportionate resource use. To support this, smart fixtures such as sensor-based urinals and low-flow spindles on taps have been installed at our Corporate office to maintain sustainable consumption levels.

14,350 KL

Water consumed

Waste management

Waste management has emerged as a key pillar of our environmental stewardship initiatives. Our objective goes beyond safe disposal. We aim to minimise generation, maximise recycling and steadily eliminate single-use materials. Offices, as central hubs of activity, present both the challenge and the opportunity to embed a culture of circularity.

36.19 MT

Waste generated (vs. 34.88 MT in FY 2023-24)

E-waste is considered for all the domestic offices of the Organisation whereas other waste is calculated for only Mumbai corporate office.

As a responsible corporate citizen, we endeavour to cover all branches with introduction of structured waste management practices across locations.

E-waste, including IT equipment, is channelled through certified handlers in line with regulations, while at corporate office sanitary waste is safely incinerated by authorised agencies. Together, these measures have helped us divert a significant portion of waste away from landfills and set a foundation for circular practices.

Sustainable Workplace Practices

To complement our efforts in managing energy, emissions, water, and waste, we have embedded a range of initiatives across our offices that make sustainability an everyday practice. These initiatives are designed to reduce resource use, promote efficiency, and create healthier work environments.

01

We encourage employees to choose virtual meetings over travel and have introduced e-visiting cards and digital standees within premises to further reduce material use.

02

At our Mumbai Corporate Office, EV charging points are available to employees, supporting the transition towards cleaner mobility.

03

Eco-friendly cleaning agents are used across branches, minimising the use of harsh chemicals and reducing environmental impact.

04

Furniture procured with sustainable wood certification ensures that our workspaces reflect responsible sourcing choices.

05

A QR-based check-in and check-out system has been implemented at the Corporate Office, eliminating paper-based processes and streamlining entry and exit.

Further, we will endeavour to strengthen our broader environmental strategy by embedding sustainability into everyday operations and employee behaviour.

Sustainability - Our Ambition for the Future

Sustainability is essential to building long-term value and preparing for the future. We focus on integrating ESG principles into every aspect of our business, from responsible investing and green energy adoption to governance and social impact. We believe that growth should not only be measured in financial terms but also in the positive outcomes we deliver for society and the environment.

Our ambition is to strengthen this integration further, driving innovation that is both responsible and inclusive. We view sustainability as a journey that requires continuous improvement and foresight. We aim to shape a resilient organisation that creates lasting impact for all stakeholders, ensuring that strength and stability today translate into sustainability for tomorrow.

We focus on advice that stays true to our clients' long-term objectives. Every recommendation is anchored in transparency, suitability and a strong sense of responsibility. That discipline is what builds trust and helps sustain value across generations.
